## READER.

Believe I have attempted a Branch of Cookery which Nobody has yet thought worth their while to write upon: But as I have both seen, and found by Experience that the Generality of Servants are greatly wanting in that Point, therefore I have taken upon me to instruct them in the best Manner I am capable; and I dare say, that every Servant who can but read with be capable of making a tollerable good Cook, and those who have the least Notion of Cookery can't miss of being very good ones.

If I have not wrote in the high, polite Stile, I hope I shall be forgiven; for my Intention is to instruct the lower Sort, and therefore must treat them in their own Way. For Example; when I bid them lard a Fowl, if I should bid them lard with large Lardoons, they would not know what I meant: But when I say they must lard with little Pieses of Buson, they know what I mean. So in many other Things in Cookery, the great Cooks have such a high Way of expressing themselves that the poor Girls are at a Loss to know what they mean: And in all Receipt Books yet printed there are such an odd Jumble of Things as would quite spoil a good Disto and indeed same I lings so extravagant, that it would be almost a Shame to make they of them, when a Disto can be made full as good, or better sirkenut them. For Example; when you entertain ten or twelves Registed you shall use for a Cullis a Leg of Veal and a Ham; switch, with the other Ingredients, makes it were expensive, and all this only to mix with other Sauce. And again, the Essence of a Ham

for Sauce to one Dift; when I will prove it for about three Shillings I will make as rich and high a Sauce as all that will be, when done. For Example; take a large deep Stew-pan, Half a Pound of Bacon, Fat and Lean together, cut the Fat and lay it. over the Bottom of the Pan; then take a Pound of Veal, cut it into thin Slices, beat it well with the Back of a Knife, lay it all over the Bacon; then have fix Pennyworth of the coarse lean Part of the Beef cut thin and well beat, lay a Layer of it all over, with some Carrot, then the Lean of the Bacon cut thin and laid over that; then cut two Onions and strew over, a Bundle of Sweet Herbs, four or five Blades of Make, fix or feven Cloves, a Spoonful of Whole Pepper, Black and White together, Half a Nutmeg beat, a Pigeon beat all to Pieces, lay that all over, Half on Ounce of Truffles and Morels, then the rest of your Beef, a good Crust of Bread toasted very brown and dry on both Sides: You may add an old Cook beat to Pieces; cover it close, and let. it stand over a slow Fire two or three Minutes, then pour in boiling Water enough to fill the Pan, cover it close, let it flein till it is as rich as you would have it, and then strain off all that Sauce. Put all your Ingredients together again, fill the Ran with boiling Water, put in a fresh Onion, a Blade of Mace, and a Piece of Carrot; cover it close, and let it stew till it is as strong as you want it. This will be full as good as the Essence of a Ham for all Sorts of Fowls, or indeed most Made-Diffees, mixed wish a Glass of Wine and two or three Spoonfuls of Catchup. When your first Gravy is cool skim off all the Fat, and keep it for Ule. This falls far short of the Expense of a Leg of Veal and a Ham, and answers every Purpose you want.

If you go to Market the Ingredients will not come to above Half a Crown; or, for about Eighteen-pence you may make as much good Gravy as will serve twenty People. Take twelve Pennyworth of coarse lean Beef, which will be six or seven Pounds, cut it all to Pieces, flour it well; take a Quarter of a Pound of good Butter, put it into a little Pot or large deep Stewpan, and put in your Beef: Keep sirring it, and when it begins to look a little Brown pour in a Pint of boiling Water; sir it together, put in a large Onion, a Bundle of Sweet Herbs, two or tires Blades of Mate, sive or six Cloves, a Spoonful of Whole Pepper, a Crust of Bread toasted, and a Piece of Carros, then pour in sour or five Quarts of Water, stir all together, cover chose, and let it stew till it is as rich as you would have it; when enough, strain it off, mix with it two or three Spoonfuls of Catchup,

up, and Half a Pint of White Wine, then put all the Ingredients together again, and put in two Quarts of boiling Water, cover is close and let it boil till there is about a Pint; strain it off well, add it to the first, and give it a boil all together. This will make a great deak of rich good Gravy.

You may leave out the Wine, according to what Use you want it for: So that really one might have a gentecl Entertainment for the Price the Sauce of one Dish comes to. But if Gentlemen will have French Cooks, they must pay for French Tricks.

A Frenchman, in his own Country, would drefs a fine Dinner of twenty Dishes, and all genteel and pretty, for the Expence he will put an English Lord to for dressing one Dish. But then there is the little petty Profit. I have heard of a Cook that used six Paunds of Butter to fry twelve Eggs; when every Body knows, that understands Cooking, that Half a Pound is full enough, or more than need be used: But then it would not be French. So much is the blind Folly of this Age, that they would rather be imposed on by a French Booby, than give Encouragement to a good English Cook!

I doubt I shall not gain the Esteem of those Gentlemen: However, let that he as it will, it little concerns me; but should I be so happy as to gain the good Opinion of my own Sex I desire no more, that will be a full Recompence for all my Trouble: And I only beg the Favour of every Lady to read my Book throughout before they censure me, and then I slatter myself I shall have their Approbation.

I shall not take upon me to meddle in the physical Way farther than two Receipts which will be of Use to the Publick in general: One is for the Bite of a mad Dog; and the other, if a Man should be near where the Plague is, he shall be in no Danger; which, if made Use of, would be found of very great Service to those who go Abroad.

Nor had I take upon me to direct a Lady in the Occonomy of ber Family, for every Mistress does, or at least ought to know what is most proper to be done there; therefore I had not fill my Book with a deal of Nonsense of that Kind, which I am very well assured none will have Regard so.

I have indeed given some of my Distes French Names to distinguish them, because they are known by those Names: And where there is great Variety of Disses and a large Table to cover, so there must be Variety of Names for them; and it matters not whether they be call d by a French, Dutch or English Name, so they are good, and done with as little Expense as the Dist will allow of.

Nor shall I take upon me to direct a Lady how to set out her Table; for that would be impertinent, and lessening her Judgment in the Oeconomy of her Family. I hope she will here find every Thing necessary for her Cook, and her own Judgment will tell her how they are to be placed. Nor indeed do I think it would be presty, to see a Lady's Table set out after the Directions of a Book.

I shall say no more, only hope my Book will answer the Ends intend it for; which is to improve the Servants, and saye the Ladies a great deal of Trouble.

## ART of COOKERY,

MADE

# Plain and Easy.

#### CHAP. I.

## Of Roasting, Boiling, &c.

HAT profess'd Cooks will find Fault with touching upon a Branch of Cookery which they never thought worth their Notice, is what I expects. However, this I know, in is the most necessary Part of it; and few Servants there are, that know how to Roast and Book to Perfection.

I don't pretend to teach profess'd Cooks, but my Design is to instruct the Ignorant and Unlearned (which will likewise before great Use in all private Families) and in so plain and full a Manner, that the most illiterate and ignorant Person, who can but read,

will know how to do every Thing in Cookery well.

I shell first begin with Roast and Boil of all Sorts, and must defire the Cook to order her Fire according to what she is to dress if any Thing very little or thin, then a pretty little brisk. Fire, that it may be done quick and nice: If a very large Joint, then be sure a good Fire be laid to cake. Let it be clear at the Bottom; and when your Meat is Half done, move the Dripping pan and Spit a little from the Fire, and stir up a good brisk Fire; for according to the Goodness of your Fire, your Meat will be done sooner or later.

BEEF.

#### R E E F

IF Beef, be fure to Paper the Top, and bafte it well ail the Time it is roafting, and throw a Handful of Soon it. When you see the Smoke draw to the Fire, it is near enough; then take off the Paper, baste it well, and drudge it with a little Flour to make a fine Froth. (Never falt your roaft Meat before you say it to the Fire, for that draws out all the Gravy. If you would keep it a few Days before you dress it, dry it very well with a clean Cloth, then flour it all over, and hang it where the Air will come to it; but be sure always to mind that there is no damp Place about it, if there is you must dry it well with a Cloth.) Take up your Meat, and garnish your Dish with nothing but Horse-raddish.

#### MUTTON and LAMB.

A S to roasting of Mutton; the Loin, the Saddle of Mutton (which is the two Loins) and the Chine (which is the two Necks) must be done as the Beef above! But all other Sorts of Mutton and Lamb must be roasted with a quick clear Fire, and without Paper; baste it when you lay it down and just before you take it up, and drudge it with a little Flour; but be sure not to use too much, for that takes away all the fine Taste of the Meat. Some chuse to skin a Loin of Mutton, and roast it Brown without Paper: But that you may do just as you please, but be sure always to take the Skin off a Breast of Mutton.

#### VEAL.

AS to Veal, you must be careful to roast it of a sine Brown; if a large Joint, a very good Fire; if a simall Joint, a pretty little brisk Fire; if a Fillet or Loin, be sure to Paper the Fat, that you lose as little of that as possible. Lay it some Distance from the Fire till it is soaked, then lay it near the Fire. When you lay it down, baste it well with good Butter; and when it is near enough baste it again, and drudge it with a little Flour. The Breast you must roast with the Caul on till it is nigh enough; and skewer the Sweetbread on the Back-side of the Breast. When it is nigh enough, take off the Caul, baste it, and drudge it with a little Flour.

PORK.

## PORK.

DORK met be well done, or it is apt to Surfeit. When you roast a Loin, take a sharp Penknise and cut the Skin across, to make the Crackling eat the better. The Chine you must not cut at all. The best Way to roast a Leg, is first to parboil it, then skin it and roast it; baste it with Butter, then take a little Sage, shred it fine, a little Pepper and Salt, a little Nutmeg, and a few Crumbs of Bread; throw these over it all the Time it is roafting, then have a little Drawn Gravy to put in the Dish with the Crumbs that drop from it. Some love the Knuckle stuffed with Onions and Sage shred small, with a little Pepper and Salt, Gravy and Apple-Sauce to it. This they call a Mock-Goofe. The Spring, or Hand of Pork, if very young, roafted like a Pig, eats very well, otherwise it is better boiled. The Sparerib should be basted with a little Bit of Butter, a very little Dust of Flour, and fome Sage shred small: But we never make any Sauce to it but Apple Sauce. The best Way to dress Pork Griskins is to broast them, baste them with a little Butter and Crumbs of Bread, Sage, and a little Pepper and Salt. Few eat any Thing with thele but Mustard.

To Roast a Pig. good one at each End, or hang a flat Iron in the Middle of the Grate. Before you lay your Pig down, take a little Sage shred small, a Piece of Butter as big as a Walnut, and a little Pepper and Salt; put them into the Pig and few it up with coarse Thread, sthen flour it all over very well, and keep flouring it till the Eyes drop our, or you find the Crackling hard. Be fore to fave all the Gravy that comes out of it, which you must do by letting Basons or Pans under the Pig in the Dripping pan, as foon as you find the Gravy begin to run. When the Pig is enough, ftir the Fire up brisk; take a coarse Cloth, with about a Quarter of a Pound of Butter in it, and rub the Pig all over till the Crackling is quite crifp, and then take it up. Lay it in your Dish, and with a strarp Knife cut off the Head, and then cut the Pig in two, before you draw out the Spir. Cut the Ears off the Head and lay at each End, and cut the Under-Jaw in two and lay on each Side: Melt some good Butter, take the Gravy you faved and put into it, boil it, and pour it into the Dish with the Brains bruiled fine, and the Sage mixed all together, and then fendent to Table.

Different

Different Sorts of Sauce for a Pig.

NOW you are to observe there are several Ways of making Sauce for a Pig. Some don't love any Sage in the Pig, only a Crust of Bread; but then you should have a little dried Sage. rubbed and mixed with the Gravy and Butter, Some love Bread-, Sauce in a Baion; made thus: Take a Pint of Water, put in a good Piece of Crumb of Bread, a Blade of Mace, and a little Whole Pepper; boil it for about five or fix Minutes, and then pour the Water off: Take out the Spice, and beat up the Bread with a good Piece of Butter. Some love a few Currants boiled in it, a Glass of Wine, and a little Sugar; but that you must do just as you like it. Others take Half a Pint of good Beef Gravy, and the Gravy which comes out of the Pig, with a Piece of Butter rolled in Flour, two Spoonfuls of Catchup, and boil them all together; then take the Brains of the Pig and bruife them fine, with two Eggs boiled hard and chopped: Put all these together, with the Sage in the Pig, and pour into your Dish. It is very good Sauce. When you have not Gravy enough comes out of your Pig with the Butter for Sauce, take about Half a Pint of Veal Gravy and add to it: Or stew the Petty-Toes, and take as much of that Liquor as will do for Sauce mixed with the other.

To Roast the Hind-Quarter of a Pig, Lamb Fashion.

A T the Time of the Year when House-Lamb is very dear, take the Hind-Quarter of a large Pig; take off the Skin and roast it, and it will eat like Lamb with Mint Sauce, or with a Sallad or Seville Orange. Half an Hour will roast it.

To Bake a Pig.

IF you should be in a Place where you cannot roast a Pig, lay it in a Dish, shour it all over very well, and rub it over with Butter; Butter the Dish you lay it in, and put it into an Oven. When it is enough, draw it out of the Oven's Mouth, and rub it over with a buttery Cloth; then put it into the Oven again till it is dry, take it out and lay it in a Dish; cut it up, take a little Veal Gravy, and take off the Fat in the Dish it was bak'd in, and there will be some good Gravy at the Bottom; put that to it, with a little Piece of Butter rolled in Flour; boil it up, and put it into the Dish with the Brains and Sage in the Belly. Some love a Pig brought whole to Table, then you are only to put what Sauce you like into the Dish.

#### To melt Butter.

In melting of Butter you must be very careful; let your Saucepan be well time'd, take a Spoonful of cold Water, a little Dust of Flour, and your Butter cut to Pieces: Be sure to keep shaking your Pan one Way for fear it should oil; when it is all melted, let it boil, and it will be smooth and sine. A Silver Pan is best, if you have one.

## To Roast Geese, Turkies, &c.

WHEN you roast a Goose, Turky, or Fowls of any Sort, take care to singe them with a Piece of white Paper, and baste them with a Piece of Butter; drudge them with a little Flour, and when the Smoak begins to draw to the Fire, and they look plump, baste them again, and drudge them with a little Flour, and take them up.

#### Sauce for a Goose.

FOR a Goose make a little good Gravy, and put it in a Bason by itself, and some Apple-Sauce in another.

### Sauce for a Turky.

FOR a Turky good Gravy in the Dish, and either Bread or Onion Sauce in a Bason.

#### Sauce for Fowls.

TO Fowls you should put good Gravy in the Dish, and either Bread or Egg Sauce in a Bason.

#### Sauce for Ducks.

FOR Ducks a little Gravy in the Dish, and Onion in a Cup, if liked.

#### Sauce for Pheasants and Partridges.

PHEASANTS and Partridges should have Gravy in the Dish, and Bread Sauce in a Cup.

#### Sauce for Larks.

ARKS, roast them, and for Sauce have Crumbs of Bread done thus: Take a Sauce-pan or Stew-pan and some Butter; when melted, have a good Piece of Crumb of Bread, and rub it

in a clean Cloth to Crumbs, then throw it into your Pan; keep stirring them about till they are brown, then throw them into a Sieve to drain, and lay them round your Larks.

To Roaft Woodcocks and Snipes.

PUT them on a little Spit; take a Round of a Three-penny Loaf and toatt it brown, then lay it in a Dish under the Birds, baste them with a little Butter, and let the Trail drop on the Toast. When they are roasted pur the Toast in the Dish, lay the Woodcocks on it, and have about a Quarter of a Pint of Gravy; pour it into the Dish, and set it over a Lamp or Chassing-dish for three Minutes, and send them to Table. You are to observe, we never take any Thing out of a Woodcock or Snipe.

## To Roast a Pigeon.

TAKE some Parsley shred fine, a Piece of Butter as big as a Walnut, a little Pepper and Salt; tye the Neck End tight; tye a String round the Legs and Rump, and fasten the other End to the Top of the Chimney-piece: Baste them with Butter, and when they are enough lay them in the Dish, and they will swim with Gravy. You may put them on a little small Spit, and then tye both Ends close.

## To Broil a Pigeon.

WHEN you broil them, do them in the same Manner, and take care your Fire is very clear, and set your Gridiron high, that they may not burn, and have a little melted, Butter in a Cup. You may split them, and broil them with a little Pepper and Salt; and you may roast them only with a little Parsley and Butter in the Dish.

## Directions for Geese and Ducks.

A S to Geese and Ducks, you should have some Sage shred fine, and a little Pepper and Salt, and put them into the Belly; but never put any Thing into Wild Ducks.

#### To Roast a Hare.

A K E your Hare when it is cas'd and make a Pudding; take a Quarter of a Pound of Sewet, and as much Crumbs of Bread, a little Parsley shred fine, and about as much Thyme as will lie on a Six-pence, when thred; an Anchovy shred small, a

very little Pepper and Salt, some Nutmeg, two Eggs, and a little Lemon-peel: Mix all this together, and put it into the Hare. Sew up the Belly, spit it, and lay it to the Rire; which must be a good one. Your Dripping-pan must be very clean and nice. Put two Quarts of Milk and Half a Pound of Butter into the Pan; keep bassing it all the while it is roaking with the Better and Milk till the Whole is used, and your Hare will be enough. You may mix the Liver in the Pudding, if you like it. You must first parboil it, and then chop it fine.

## Different Sorts of Sauce for a Hare.

AKE for Sauce a Pint of Cream and Half a Pound of fresh Butter; put them in a Sauce-pan, and keep stirring it with a Spoon till all the Butter is meked, and the Sauce is thick; then take up the Hare, and pour the Sauce into the Dish. Another Way to make Sauce for a Hare, is to make good Gravy, thicken'd with a little Piece of Butter rolled in Flour; and pour it into your Dish. You may leave the Butter out, if you don't like it, and have some Currant Jelly warm'd in a Cup, or Red Wine and Sugar boil'd to a Syrup: Done thus; take Half a Pint of Red Wine, a Quarter of a Pound of Sugar, and let over a flow Fire to simmer for about a Quarter of an Hour. You may do Half the Quantity and put it into your Sauce-Boat or Bason.

#### To Broil Steaks.

LIRST have a very clear brisk Fire; let your Gridiron be very clean; put it on the Fire, and take a Chaffing-dish with a few hot Coals out of the Fire: Put the Dish on it which is to lay your Steaks on, then take fine Rump Steaks about Half an Inch thick; put a little Pepper and Salt on them, lay them on the Gridiron, and (if you like it) take a Shalot or two, or a fine Onion, and cut it fine; put it into your Dish: Don't turn your Steaks till one Side is done, then when you turn the other Side there will soon be a fine Gravy lie on the Top of the Steak, which you must be eareful not to lose. When the Steaks are enough take them carefully off into your Dish, that none of the Gravy be lost; then have ready a hot Dish or Cover, and carry them hot to Table, with the Cover on.

## Directions concerning the Sauce for Steaks.

I F you love Pickles or Horse-raddish with Steaks, never garnish your Dish, because both the Garnishing will be dry, and the Steaks will be cold, but lay those Things on little Plates, and carry to Table. The great Nicety is to have them hot and full of Gravy.

## General Directions concerning Broiling.

A S to Mutton and Pork Steaks, you must keep them turning quick on the Gridiron, and have ready your Dish over a Chassing-dish of hot Coals, and carry them to Table cover'd hot. When you broil Fowls or Pigeons always take Care your Fire is clear, and never baste any Thing on the Gridiron, for it only makes it smoak'd and burnt.

## General Directions concerning Boiling.

A S to all Sorts of boil'd Meats, allow a Quarter of an Hour to every Pound; be fure the Pot is very clean, and skim it well, for every Thing will have a Scum rife, and if that boils down it makes the Meat black. All Sorts of fresh Meat you are to put in when the Water boils, but salt Meat when the Water is cold.

#### To Boil a Ham.

WHEN you boil a Ham, put it into a Copper, if you have one; let it be about three or four Hours before it boils, and keep it well skim'd all the Time; then, if it is a small one, one Hour and a Half will boil it, after the Copper begins to boil; and, if a large one, two Hours will do: For you are to consider the Time it has been hearing in the Water, which softens the Ham, and makes it boil the sooner.

## To Boil a Tongue.

A Tongue, if falt, put it in the Pot over Night, and don't let it boil till about three Hours before Dinner, and then boil all that three Hours; if fresh out of the Pickle, two Hours, and put it in when the Water boils.

To

#### To Boil Fowls and House-Lamb.

FOW LS and House-Lamb boil in a Pot by themselves, in a good deal of Warer, and if any Scum rises take it off. They will be both sweeter and whiter than if boil'd in a Cloth. A little Chicken will be done in fifteen Minutes, a large Chicken in twenty Minutes, a good Fowl in Half an Hour, a little Turky or Goose in an Hour, and a large Turky an Hour and a Half.

## Sauce for a Boild Turky.

THE best Sauce to a boil'd Turky is this: Take a little Water, or Mutton Gravy, if you have it, a Blade of Mace, an Onion, a little Bit of Thyme, a little Bit of Lemon-peel, and an Anchovy; boil all these together, strain them through a Sieve, melt some Butter and add to them, and fry a few Saulages and lay round the Dish. Garnish your Dish with Lemon.

#### Sauce for a Boild Goose.

SAUCE for a boil'd Goose must be either Onions or Cabbage, first boil'd, and then stew'd in Butter for five Minutes.

#### Sauce for Boil'd Ducks or Rabbits.

T O boil'd Ducks or Rabbits, you must pour boil'd Onions over them, which make thus: Take the Onions, peel them, and boil them in a great deal of Water; shift your Water, then let them boil about two Hours, take them up and throw them into a Cullender to drain, then with a Knife chop them on a Board; put them into a Sauce-pan, just shake a little Flour over them, put in a little Milk or Cream, with a good Piece of Butter; fet them over the Fire, and when the Butter is all melted they are enough. But if you would have Onion-Sauce in Half an Hour, take your Onions, peel them, and cut them in thin Slices, put them into Milk and Water, and when the Water boils they will be done in twenty Minutes, then throw them into a Cullender to drain, and chop them and put them into a Sauce-pan; shake in a little Flour, with a little Cream, if you have it, and a good Piece of Butter; ftir all together over the Fire till the Butter is melted, and they will be very fine. This Sauce is very good with roaft Mutton, and it is the best Way of boiling Onions.

#### To Roaft Verision.

TAKE a Haunch of Venison, and spir it; take four Sheets of white Paper, butter them well, and roll about your Venison, then tye your Paper on with a small String, and baste it very well all the Time it is Roasting. If your Fire is very good and brisk, two Hours will do it; and, if a small Haunch, an Hour and a Half. The Neck and Shoulder must be done in the same Manner, which will take an Hour and a Half, and when it is enough take off the Paper, and drudge it with a little Flour just to make a Froth; but you must be very quick, for fear the Fat should melt. You must not put any Sauce in the Dish but what comes out of the Meat, but have some very good Gravy and put into your Sauce Boat or Bason. You must always have Sweet-Sauce with your Venison in another Bason. If it is a very large Haunch it will take two Hours and a Half.

## Different Sorts of Sauce for Venison.

YOU may take either of these Sauces for Venison: Currant Jelly warm'd; or Half a Pint of Red Wine, with a Quarter of a Pound of Sugar; simmer'd over a clear Fire for sive or sax Minutes; or Half a Pint of Vinegar, and a Quarter of a Pound of Sugar, simmer'd till it is a Syrup!

## To Roaft Mutton, Venison Fastion.

TAKE a Hind-Quarter of fat Mutton, and cut the Leg like a Haunch; lay it in a Pan with the Back-Side of it down; pour a Bottle of Red Wine over it, and let it lye twenty-four Hours, then spit it, and baste it with the same Liquor and Butter all the Time it is Roasting at a good quick Fire, and an Hour and a Half will do it. Have a little good Gravy in a Cup, and Sweet-Sauce in another. A good fat Neck of Mutton eats finely, done thus.

# To keep Venison or Hares sweet; or to make them fresh, when they stink.

I F your Venison be very sweet, only dry it with a Cloth, and hang it where the Air comes. If you would keep it any Time, dry it very well with clean Cloths, rub it all over with beaten Ginger, and hang it in an airy Place, and it will keep a great while. If it slinks, or is musty, take some luke-warm Water, and wash

wash it clean; then take fresh Milk and Water luke-warm, and wash it again; then dry it in clean Cloths very well, and rub it all over with beaten Ginger, and hang it in an airy Place. When you roast it, you need only wipe it with a clean Cloth and paper it, as before-mention'd. Never do any Thing else to Venison, for all other Things spoil your Venison, and take away the fine Flavour, and this preserves it better than any Thing you can do. A Hare you may manage just the same Way.

## To Roaft a Tongue, or Udder.

PArboil it first, then roast it, stick eight or ten Cloves about it; baste it with Butter, and have some Gravy and Sweet-Sauce.

An Udder ears very well, done the same Way.

## To Roast Rabbits.

BASTE them with good Butter, and drudge them with a little Flour. Half an Hour will do them, at a very quick clear Fire; and, if they are very small, twenty Minutes will do them. Take the Liver, with a little Bunch of Parsley, and boil them, and then chop them very fine together. Melt some good Butter, and put Half the Liver and Parsley into the Butter; pour it into the Dish, and garnish the Dish with the other Half. Let your Rabbits be done of a fine light Brown.

## To Roaft a Rabbit, Hare Fashion.

ARD a Rabbit with Bacon; roast it as you do a Hare, and it ears very well: But then you must make Gravy-Sauce; but if you don't lard it White-Sauce.

## Turkies, Phealants, & c. may be Larded.

YOU may lard a Turky, or Pheafant, or any Thing, just as you like it.

## To Roaf a Fowl, Pheasant Fastion.

If you should have but one Pheasant, and want two in a Dista, take a large sull grown Fowl, keep the Head on, and truss it just as you do a Pheasant; lard it with Bacon, but don't lard the Pheasant, and no Body will know it.

C

Rules

## Rules to be observ'd in Roasting.

IN the first Place, take great Care the Spit be very clean; and be sure to clean it with nothing but Sand and Water. Wash it clean, and wipe it with a dry Cloth; for Oil, Brick-dust, and such Things, will spoil your Meat.

## P O R K

PORK must be well done. To every Pound allow a Quarter of an Hour: For Example; a Joint of twelve Pounds Weight three Hours, and so on; if it be a thin Piece of that Weight two Hours will roast it.

## Directions concerning Beef, Mutton and Pork.

VEAL.

## VEAL.

EAL takes much the same Time roasting as Pork; but be sure to paper the Fat of a Loin or Filler, and baste your Veal with good Butter.

## HOUSE-LAMB.

Hour. The Out-fide must be paper'd, basted with good Butter, and you must have a very quick Fire. If a Leg, about three Quarters of an Hour; a Neck, Breast or Shoulder, three Quarters of an Hour; if very small, Half an Hour will do.

#### A P I G

I F just kill'd, an Hour; if kill'd the Day before, an Hour and a Quarter; if a very large one, an Hour and a Half. But the best Way to judge is when the Eyes drop out, and the Skin is grown very hard; then you must rub it with a coarse Cloth, with a good Piece of Butter roll'd in it, till the Crackling is crisp, and of a fine light Brown.

#### A H A R E.

YOU must have a quick Fire. If it be a small Hare, put three Pints of Milk and Half a Pound of fresh Butter in the Dripping-pan, which must be very clean and nice; if a large one, two Quarts of Milk and Half a Pound of fresh Butter. You must haste your Hare well with this all the Time it is roasting, and when the Hare has soak'd up all the Butter and Milk it will be enough.

#### A JURKY.

#### TAME DUCKS.

OBSERVE the fame Rules.

#### WILD DUCKS.

OBSERVE the fame Rules.

# WOODCOCKS, SNIPES and PARTRIDGES.

THEY will take twenty Minutes.

## PIGEONS and LARKS.

HEY will take fifteen Minutes to do them.

## Directions concerning Poultry.

IF your Fire is not very quick end clear when you lay your Poultry down to roaft, it will not eat near so sweet, or look so beautiful to the Eye.

## To keep Meat hot.

THE best Way to keep Meat hot, if it be done before your Company is ready, is to let the Dish over a Pan of boiling Water; cover the Dish with a deep Cover so as not to touch the Meat, and throw a Cloth over all. Thus you may keep your Meat hot a long Time, and it is better than over roasting and ipoiling the Meat. The Steam of the Water keeps the Meat hot, and don't draw the Gravy out, or dry it up; whereas if you set a Dish

Dish of Meat any Time over a Chaffing-Dish of Coals, it will dry up all the Gravy, and spoil the Meat.

## To dress Greens, Roots, &c.

A LWAYS be very careful that your Greens be nicely pick'd and wash'd. You should lay them in a clean Pan for fear of Sand or Dust, which is apt to hang round wooden Vessels. Boil all your Greens in a Copper Sauce-pan by themselves with a great Quantity of Water. Boil no Meat with them, for that discolours them. Use no Iron Pans, &c. for they are not proper; but let them be Copper, Brass or Silver.

## To dress Spinach.

PICK it very clean, and wash it in five or fix Waters; put it in a Sauce-pan that will just hold it, throw a little Salt over it, and cover the Pan close. Don't put any Water in, but shake the Pan often. You must put your Sauce-pan on a clear quick Fire. As soon as you find the Greens are shrunk and sallen to the Bottom, and that the Liquor which comes out of them boils up, they are enough. Throw them into a clean Sieve to drain, and just give them a little Squeeze. Lay them in a Plate, and never put any Butter on it, but put it in a Cup.

## To dress Cabbages, & c.

CAbbage, and all Sorts of young Sprouts, must be boiled in a great deal of Water. When the Stalks are tender, or fall to the Bottom, they are enough; then take them off, before they lose their Colour. Always throw Salt into your Water before you put your Greens in. Young Sprouts you fend to Table just as they are, but Cabbage is best chopp'd and put into a Sauce-pan with a good Piece of Butter, stirring it for about five or fix Minutes till the Butter is all melted, and then send it to Table.

## To dress Carrots.

TET them be scrap'd very clean, and when they are enough rub them in a clean Cloth, then slice them into a Plate, and pour some melted Butter over them. If they are young Spring Carrots, Half an Mour will boil them; if large, an Hour; but old Sandwich Carrots will take two Hours.

70

## To dress Turnips.

THEY eat best boil'd in the Pot, and when enough take them out and put them into a Pan and mash them with Butter and a little Salt, and send them to Table. But you may do them thus; pare your Turnips, and cut them into Dice as big as the Top of one's Finger; put them into a clean Sauce-pan and just cover them with Water; when enough throw them into a Sieve to drain, and put them into a Sauce-pan with a good Piece of Butter; stir them over the Fire for sive or fix Minutes, and fend them to Table.

## To dress Parsnips.

THEY should be boil'd in a great deal of Water, and when you find they are lost (which you will know by running a Fork into them) take them up, and carefully scrape all the Dirt off them, and then with a Knife scrape them all fine, throwing away all the sticky Parts; then put them into a Sauce-pan with some Milk, and stir them over the Fire till they are thick. Take great Care they don't burn, and add a good Piece of Butter and a little Salt, and when the Butter is melted fend them to Table,

## To dress Brockala.

STRIP all the little Branches off till you come to the top one, then with a Knife peel off all the hard outside Skin which is on the Stalks and little Branches, and throw them into Water. Have a Stew-pan of Water with some Salt in it: When it boils put in the Brockala, and when the Stalks are tender it is enough; then send it to Table with Butter in a Cup. The French eat Oil and Vinegar with it.

#### To dress Potatoes.

YOU must boil them in as little Water as you can without burning the Sauce-pan. Cover the Sauce-pan close, and when the Skin begins to crack they are enough: Drain all the Water out and let them stand cover'd for a Minute or two; then peel them, lay them in your Plate, and pour some melted Butter over them. The best Way to do them is, when they are peel'd to lay them on a Gridiron till they are of a fine Brown, and send them to Table. Another Way is to put them into a Sauce-pan with some good Beef Dripping, cover them close, and shake the Sauce-pan often for sear of burning to the Bottom: When they are of a fine

fine Brown and crifp, take them up in a Plate, then put them into another for fear of the Fat, and put Butter in a Cup.

## To dress Cauliflowers.

## To dress Artichokes.

WRING off the Stalks, and put them into the Water cold with the Tops downwards, that all the Dust and Sand may boil out. When the Water boils, an Hour and a Half will do them.

## To dress Asparagus.

CRAPE all the Stalks very carefully till they look white, then cut all the Stalks even alike, throw them into Water and have ready a Stew-pan boiling: Put in some Salt, and tye the Asparagus in little Bundles. Let the Water keep boiling, and when they are a little tender take them up. If you boil them too much you lose both Colour and Taste. Cut the Round of a small Loaf about Half an Inch thick, toast it Brown on both Sides, dip it in the

the Asparagus Liquor, and lay it in your Diss. Pour a little Butter over the Toast, then lay your Asparagus on the Toast all round the Dish with the white Tops outward. Don't pour Butter over the Asparagus, for that makes them greasy to the Fingers, but have your Butter in a Bason, and send it to Table.

## Directions concerning Garden Things.

MOST People spoil Garden Things by over boiling them: All Things that are Green should have a little Crisppess, for if they are over boil'd they neither have any Sweetness or Beauty.

## To dress Beans and Bacon.

WHEN you dress Beans and Bacon, boil the Bacon by itself and the Beans by themselves, for the Bacon will spoil the Colour of the Beans. Always throw some Salt into the Water, and some Parsley nicely pick'd. When the Beans are enough (which you will know by their being tender) throw them into a Cullender to drain: Take up the Bacon and skin it; throw some Raspings of Bread over the Top, and if you have an Iron make it red-hot and hold over it, to brown the Top of the Bacon: If you have not one, set it before the Fire to brown. Lay the Beans in the Dish, and the Bacon in the Middle on the Top, and send them to Table, with Butter in a Bason.

# To make Gravy for a Turky, or any Sort of Fowl.

AKE a Pound of the lean Part of the Beef, hack it with a Knife, flour it well, have ready a Stew-pan with a Piece of fresh Butter: When the Butter is melted put in the Beef, fry it till it is Brown, and then pour in a little boiling Water; shake it round, and then fill up with a Tea-kettle of boiling Water: Stir it all together, and put in two or three Blades of Mace, four or five Cloves, some Whole Popper, an Onion, a Bundle of Sweet Herbs, a little Crust of Bread baked Brown, and a little Piece of Carrot: Cover it close, and let it stew till it is as good as you would have it. This will make a Pint of rich Gravy.

## To draw Mutton, Beef, or Veal Gravy.

TAKE a Pound of Meat, cut it very thin, lay a little Piece of Bacon about two Inches long at the Bottom of the Stew-pan

vy,

or Sauce-pan, and lay the Meat on it: Lay in some Carrot, and cover it close for two or three Minutes, then pour in a Quart of boiling Water, some Spice, Onion, Sweet Herbs, and a little Crust of Bread toasted; let it do over a flow Fire, and thicken it with a little Piece of Butter rolled in Flour. When the Gravy is as good as you would have it season it with Salr, and then strain it off. You may omit the Bacon, if you dislike it.

## To burn Butter for thickening of Sauce.

SET your Butter on the Fire and let it boil till it is brown, then shake in some Flour, and stir it all the Time it is on the Fire till it is thick. Put it bye, and keep it for Use. A little Piece is what the Cooks use to thicken and brown their Sauce; but there are sew Stomachs it agrees with, therefore seldom make use of it.

#### To Bake an Ox's Head.

DO it just in the same Manner as the Leg of Beef is directed to be done in the making Gravy for Soops, &c. and it does full as well for the same Uses. If it should be too strong for any Thing you want it for, it is only putting some hot Water. Cold Water will spoil it.

#### To Boil Pickled Pork.

BE fure you put it in when the Water boils. If a middling Piece an Hour will boil it: If a very large Piece, an Hour and a Half, or two Hours. If you boil pickled Pork too long it will go to a Jelly.

## MADE - DISHES.

#### To dress Scotch Collops.

TAKE Veal, cut it thin, beat it well with the Back of a Knife or Rolling-pin, and grate some Nutmeg over them; dip them in the Yolk of an Egg, and fry them in a little Butter till they are of a fine Brown; then pour the Butter from them, and have ready Half a Pint of Gravy, a little Piece of Butter rolled in Plour, a few Mushrooms, a Glass of White Wine, the Yolk of an Egg, and a little Cream mixt together. If it wants a little Salt put it in. Stir it all together, and when it is of a fine Thickness dish it up. It does very well without the Cream, if you have none; and very well without Gravy, only put in just as much warm Water, and either Red or White Wine.

#### Another Way to Ragoo a Breast of Veal.

YOU may bone it nicely, flour it, and fry it of a fine Brown, then pour the Fat out of the Pan, and the Ingredients as above, with the Bones; when enough, take it out, and firain the Liquor, then put in your Meat again, with the ingredients, as before directed.

Onion stuck with a few Cloves, and a little Salt: Cover it close, and let it stew an Hour, or till it is boil'd to your Palate, if you would have Soop made of it; if you would only have Sauce to eat: with the Veal, you must stew it till there is just as much as you would have for Sauce, and feafon it with Salt to your Palate; take out the Onion, Sweet Herbs and Spice, and pour it all together into your Dish. It is a fine Dish. If you have no Pease, pare three or four Cucumbers, scoop out the Pulp and cut it into little Pieces, and take four or five Heads of Sellery, clean wash'd, and cut the white Part small; when you have no Lettuces, take the little Hearts of Savoys, or the little young Sprouts that grow on the old Cabbage Stalks about as big as the Top of your Thumb.

Note, If you would make a very fine Dish of it, fill the Infideof your Lettuce with Force-Meat, and tye the Top close with a st Thread; stew it till there is but just enough for Sauce, set the Lettuce in the Middle, and the Veal round, and pour the Sauce all over it. An Hour and a Quarter will do it. When it has been about an Hour at the Firetake off the Caul, drudge it with Flour, baste it well with Fresh Butter, and let it be of a fine Brown. For Sauce take Two Pennyworth of Gravy Beef, cut it and hack it well, then flour it, fry it a little Brown, then pour into your Stew pan some boiling Wa-Frer, stir it well together, then fill your Pan two Parts full of Water, put in an Onion, a Bundle of Sweet Herbs, a little Crust of Bread toasted, two or three Blades of Mace, sour Cloves, some Whole Pepper, and the Bones of the Veal: Cover it cloie, and let it stew till it is quite rich and thick, then strain it, boil it up again with Truffles and Morels, a few Mushrooms, a Spoonful of Catchup, two or three Bottoms of Artichokes, if you have them,

add a little Salt, just enough to season the Gravy, take the Packthread off the Veal, and set it upright in the Dish; cut the Sweetbread into sour, and broil it of a fine Brown, with a few Force-Meat Balls fry'd, lay these round the Dish, and pour in the Sauce. #### To Ragoo a Piece of Beef.

TAKE a large Piece of the Flank which has Fat at the Top cut square, or any Piece that is all Meat, and has Fat at the Top, but no Bones. The Rump does well. Gut all nicely off the Bone (which makes fine Soop) then take a large Stew-pan and with a good Piece of Butter fry it a little Brown all over, flouring your Meat well before you put it into the Pan, then pour in as much Gravy as will cover it, made thus: Take about a Pound of coarse Beef, a little Piece of Veal cut small, a Bundle of Sweet Herbis, an Onion, some Whole Black Pepper and White Pepper, two or three large Blades of Mace, sour or five Cloves, a Piece of Carrot, a little Piece of Bacon steep'd in Vinegar a little while, a

When the Gravy is done strain it, pour k into the Pan where the Beef is, take an Ounce of Trusses and Morels cut small, some sresh or dry'd Mushrooms cut small, two Spoonfuls of Catchup, and cover it close; let all this stew till the Sauce is rich and thick, then have ready some Artichoke-bottoms cut into four, and a few pickled Mushrooms; give them a Boil or two, and when your Meat is tender and your Sauce quite rich, lay the Meat into a Dish and pour the Sauce over it. You may add a Sweetbread cut in six Pieces, a Palate stew'd tender cut into little Pieces, some Cocks Combs, and a few Force-Meat Balls. These are a great Addition, but it will be good without.

Note, For Variety when the Beef is ready and the Gravy put to it, add a large Bunch of Sellery cut small and wash'd clean, two Spoonfuls of Catchup, and a Glass of Red Wine. Omit all the other Ingredients. When the Meat and Sellery are tender, and the Sauce rich and good, serve it up. It is also very good this Way: Take six large Cucumbers, scoop out the Seeds, pare them, cut them into Slices, and do them just as you do the Sel-

lery.

TAKE Sage, wash it, pick it clean, chop it small, with Pepper and Salt; roll them in Butter and put them into the Belly; never put Onion into any Thing unless you are sure every Body loves it; take Care that your Goose be clean pick'd and wash'd; I think the best Way is to scald a Goose, and then you are sure it is clean, and not so strong: Let your Water be scalding hot, and dip in your Goose for a Minute, then all the Feathers will come off clean; when it is quite clean wash it with cold Water, and dry it with a Cloth; roast it and baste it with Butter, and when it is Half done throw some Flour over it, that it may have a fine Brown; three Quarters of an Hour will do it at a quick Fire, if it is not too large, otherwise it will require an Hour; always have good Gravy in a Bason, and Apple-Sauce in another.

A Green

#### A Green Goose.

EVER put any Seasoning into it, unless defired; you must either put good Gravy, or Green Sauce in the Dish made thus: Take a Handful of Sorrel, beat it in a Mortar, and squeeze the Juice out, add to it the Juice of an Orange or Lemon, and a little Sugar, heat it in a Pipkin, and pour it into your Dish, but the best Way is to put Gravy in the Dish, and Green Sauce in a Cup or Boat; or made thus: Take Half a Pint of the Juice of Sorrel, a Spoonful of White Wine, a little grated Nutmeg, a little grated Bread, boil these a Quarter of an Hour softly, then strain it and put it into the Sauce pan again, and sweeten it with a little Sugar, give it a boil and pour it into a Dish or Bason; some like a little Piece of Butter rolled in Flour and put into it.

GET a fat Goose, take a Handful of common Salt, a Quarter of an Ounce of Salt-Petre, a Quarter of a Pound of coarse Sugar, mix all together, and rub your Goose very well, let it lie in this Pickle a Fortnight, turning and rubbing it every Day, then roll it in Bran and hang it up in a Chimney where Wood-Smoke is for a Week. If you have not that Conveniency send it to the Bakers, the Smoke of the Oven will dry it, or you may hang it in your own Chimney, not too near the Fire, but make a Fire under it, and lay Horse-Dung and Saw-Dust on it, and that will imother and smoke-dry it; when it is well dried keep it in a dry Place, you may keep it two or three Months or more; when you boil it put it in a good deal of Water, and be sure to skim it well.

an Hour: In the mean Time make a Ragoo, boil some Turnips almost enough, some Carrots and Onions quite enough; cut them all into little Pieces, put them into a Sauce-pan with Half a Pint of good Beef Gravy, a little Pepper and Salt, a Piece of Butter rolled in Flour, and let this stew all together for a Quarter of an Hour; take the Goose and drain it well, then lay it in the Dish, and pour the Ragoo over it.

Where the Onion is disliked, leave it out. You may add Cab-

bage boiled and chopped fmall.

#### A Goose à la Mode.

AKE a large fine Goose, pick it clean, skin it, and cut it down the Back, bone it nicely, take the Fat off, then take a dried Tongue, boil it and peel it: Take a Fowl and do it in the same Manner as the Goose, season it with Pepper, Salt, and heaten Mace, roll it round the Tongue, season the Goose with the same, put the Tongue and Fowl in the Goose, and sew the Goose up again in the same Form it was before; put it into a little Pot that will just hold it, put to it two Quarts of Beef Gravy, a Bundle of Sweet Herbs, and an Onion; put some Slices of Ham, or good Bacon, between the Fowl and Goofe, cover it close, and let it stew an Hour over a good Fire: When it begins to boil let it do very foftly, then take up your Goofe and skim off all the Fat, strain it, put in a Glass of Red Wine, two Spoonfuls of Catchup, a Veal Sweetbread cut small, some Truffles, Morels, and Mushrooms, a Piece of Butter rolled in Flour, and some Pepper and Salt, if wanted; put in the Goose again, cover it close, and let it stew Half an Hour longer, then take it up and pour the Ragoo over it. Garnish with Lemon.

Note, This is a very fine Dish. You must mind to save the Bones of the Goose and Fowl, and put them into the Gravy when it is first set on, and it will be better if you roll some Beef Marrow between the Tongue and Fowl, and between the Fowl and Goose, it will make them mellow and eat sine. You may add six or seven Yolks of hard Eggs whole in the Dish, they are a pretty

Addition.

#### To Stew Giblets.

ET them be nicely scalded and picked, break the two Pinion
Bones in two, cut the Head in two, and cut off the Nostrils;
that the Liver in two, the Gizzard in four, and the Neck in two;
the off the Skin of the Neck, and make a Pudding with two hard
Eggs chopped fine, the Crumb of a French Roll steeped in hot
Milk

Milk two or three Hours, then mix it with the hard Egg, a little Nutmeg, Pepper, Salt, and a little Sage chopped fine, a very little melted Butter, and flir it together: Tye one End of the Skin, and fill it with the Ingredients, tye the other End tight, and put all together into a Sauce-pan, with a Quart of good Mutton Broth, a Bundle of Sweet Herbs, an Onion, some Whole Pepper, Mace, two or three Cloves ty'd up loofe in a Muslin Rag, and a very little Piece of Lemon-peel; cover them close, and let them flew till quite tender, then take a small French Roll toasted Brown on all Sides, and put it into the Sauce-pan, give it a shake, and let it stew till there is just Gravy enough to eat with them, then take out the Onion, Sweet Herbs, and Spice, lay the Roll in the Middle, the Giblets round, the Pudding cut into Slices and laid round, and then pour the Sauce over all.

## Another Way.

AKE the Giblets clean pick'd and wash'd, the Feet skinn'd and Bill cut off, the Head cut in two, the Pinion Bones broke into two, the Liver cut in two, the Gizzard cut into four, the Pipe pull'd out of the Neck, and the Neck cut in two: Put them into a Pipkin with Half a Pint of Water, some Whole Pepper, Black and White, a Blade of Mace, a little Sprig of Thyme, a small Onion, and a little Crust of Bread, then cover them close, and set them on a very flow Fire. ## To Roaft Pigeons,

They will roast nicely, and be full of Gravy. Take Care how you take them off, not to lose any of the Liquor. You may melt a very little Butter and put into the Dish. Your Pigeons ought to be quite fresh, and not too much done. This is by much the best Way of doing them, for then they will swim in their own Gravy, and a very little melted Butter will do.

W hen

When you roaft them on a Spit all the Gravy runs out, or if you stuff them and broil them Whole you cannot save the Gravy so well, though they will be very good with Parsley and Butter in the Dish, or split and broiled with Pepper and Salt.

You may garnish with a Lemon notched, or let it alone.

Send it to Table hot in enough. the Dish.

Note, This Dish was first contrived by Mr. Rich, and is much admired by the Nobility.

#### To dress a Loin of Pork with Onions.

TAKE a Fore-Loin of Pork and roast it, as at another time, peel a Quarter of a Peck of Onions, and slice them thin, lay them in the Dripping-pan, which must be very clean, under the Pork, let the Fat drop on them; when the Pork is nigh enough, put the Onions into the Sauce-pan, let them simmer over the Fire a Quarter of an Hour, shaking them well, then pour out all the Fat as well as you can, shake in a very little Flour, a Spoonful of Vinegar, and three Tea Spoonfuls of Mustard, shake all well together, and stir in the Mustard, set it over the Fire for four or five Minutes, lay the Pork in a Dish, and the Onions in a Bason. If the Sauce be too thick, add a little more Water before it is done, and more Salt if it wants it. You are to observe the Sauce must be pretty thick.

#### To make a Pellow the India Way.

TAKE a Piece of pickled Pork and better than Half boil it in a Gallon of Water, then take it out and pick out all the Bones, put in two Fowls, and Half a Pound of Rice, a Tea Spoonful of White Pepper, and a Tea Spoonful of Cloves, when beat fine, twelve very imall Onions, when you think the Fowls Half boiled put in the Pork and let it do foftly over a flow Fire till enough, then lay the Fowls in a Dish, and the Pork on each Side the Rice. If you find it too thin drain it dry, lay it in a Dish and garnish it with hard Eggs. You must be sure to take great Care the Rice don't burn to the Pot.

Anotier-

#### Another Way to make a Pellow.

TAKE a Leg of Veal, about twelve or fourteen Pounds Weight, an old Cock skinned, chop both to Pieces, put it into a Pot with five or fix Blades of Mace, some whole White Pepper, and three Gallons of Water, Half a Pound of Bacon, two Onions and fix Cloves; cover it close, and when it boils let it do very softly, till the Meat is good for nothing and above two Thirds is wasted, then strain it, the next Day put this Soop into a Sauce-pan, with a Pound of Rice, set it over a very slow Fire, take great Care it don't burn, when the Rice is very thick and dity turn it into a Dish. Garnish with hard Eggs cut in two, and have roasted Fowls in another Dish.

Note, You are to observe, if your Rice simmers too saft it will born, when it comes to be thick. It must be very thick and dry, and the Rice not boiled to a Mummy.

#### To make Essence of Hami

TAKE off the Fat of a Ham, and cut the Lean in Slices; beat them well and lay them in the Bortom of a Stew-parl, with Slices of Carrots, Parthips, and Onions; cover your Pan, and fet it over a gentle Fire: Let them flew till they begin to slick, then sprinkle on a little Flour, and turn them; then moissen with Broth and Veal Gravy. Season them with three or four Mushrooms, as many Trusses, a Whole Leak, some Parsley, and Half a Dozen Cloves, or instead of a Leek, a Clove of Garlick, put in some Crusts of Bread, and let them simmer over the Fire for a Quarter of an Hour, strain it and let it away for Use. Any Pork or Ham does for this, that is well made.

### Rules to be observed in all Made-Dishes.

TIRST, that the Stew-pans, or Sauce-pans and Covers, he very clean, free from Sand, and well tinned; and that all the White Sauces have a little Fartness, and be very smooth, and of a fine Thickness, and all the Time any White Sauce is over the Fire keep stirring it one Way.

And as to Brown Sauce take great Care no Fat fwims at the Top, but that it he all smooth alike, and about as thick as good Cream, and not to taste of one Thing more than another; as to Pepper and Salt, season to your Palate, but don't put too much of either, for that will take away the sine Flavour of every Thing; As to most Made-Dishes, you may put in what you think proper to inlarge it, or make it good; as Mushrooms, pickled, dry'd,

dry'd, fresh, or powder'd; Trusses, Morels, Cocks Combs stewed, Ox Palates cut in little Bits, Artichoke Bottoms, either pickled, fresh boiled, or dry'd ones sostened in warm Water each cut in four Pieces, Asparagus Tops, the Yolks of hard Eggs, Force-Meat Balls, &c. The best Things to give Sauce a Tarrness are Mushroom Pickle, White Walnut Pickle, or Lemon Juice.

#### CHAP. III.

Read this CHAPTER, and you will find how expensive a French Cook's Sauce is.

The French Way of Dreffing Partridges.

WHEN they are newly picked and drawn, finge them: You must mince their Livers with a Bit of Butter, some scraped Bacon, green Truffles if you have any, Parsley, Chimbol, Sak, Pepper, Sweet Herbs, and Alipice. The Whole being minced together, put it in the Infide of your Partridges, then ftop both Ends of them, after which give them a fry in the Stew-pan; that being done, ipit them, and wrap them up in Slices of Bacon and Paper; then take a Stew-pan, and having put in an Onion cut into Slices, a Carrot cut into little Bits, with a little Oil, give them a few toffes over the Fire; then moisten them with Gravy, Cullis, and a little Essence of Ham. Put therein Half a Lemon cut into Slices, four Cloves of Garlick, a little Sweet Bafil, Thyme, a Bay-Leaf, a little Parsley, Chimbol, a couple of Glasses of White Wine, and sour of the Carcasses of the Partridges; let them be pounded, and put them in this Sauce, When the Fat of your Cullis is taken away, be careful to make it relishing; and after your pounded Livers are put into your Cullis, you must strain them through a Sieve. Your Partridges being done; take them off, as also take off the Bacon and Pepper, and lay them in your Dish with your Sauce over them.

This Distr I do not recommend; for I think it an odd Jumble of Trash, by that Time the Cullis, the Essence of Ham, and all other Ingredients are reckoned, the Partridges will come to a sine Penny. But such Receipts as this, is what you have in most

Books of Cookery yet printed.

To make Essence of Ham.

AKE the Pat off a Westpholia Ham, cut the Lean in Slices, beat them well and lay them in the Bottom of a Stew pan, with Slices of Carrots, Parinips, and Onions: Cover your Pan, and

and set it over a gentle Fire; let them stew till they begin to stick, then sprinkle on a little Flour, and turn them; then moisten with Broth and Veal Gravy, season with three or sour Mushrooms, as many Truffles, a whole Leek, some Basil, Parsley, and Half a Dozen Cloves; or instead of the Leek, you may put a Clove of Garlick. Put in some Crusts of Bread, and let them simmer over the Fire for three Quarters of an Hour. Strain it, and set it by for Use.

A Cullis for all Sorts of Ragoo.

AVING cut three Pounds of lean Veal, and Half a Pound of Ham, into Slices, lay it into the Bottom of a Stew-pan, put in Carrots and Parinips, and an Onion fliced; cover it, and fet it a flewing over a Stove: When it has a good Colour, and begins to slick, put to it a little melted Bacon, and shake in a little Flour, keeping it moving a little while till the Flour is fried; then moisten it with Gravy, and Broth, of each a like Quantity, then put in some Parsley and Basil, a whole Leek, a Bay-leaf, some Mushrooms, and Truffles minced small, three or four Cloves, and the Crust of two French Rolls: Let all this simmer together for three Quarters of an Hour; then take out your Slices of Veal; strain it, and keep it for all Sorts of Ragoos. Now compute the Expence, and see if this Dish cannot be dressed full as well without this Expence.

A Cullis for all Sorts of Butcher's Meat.

YOU must take Meat according to your Company. If ten or twelve, you can't take less than a Leg of Veal, and a Ham, with all the Fat, and Skin, and Outside cut off: Cut the Leg of Veal in Pieces, about the Bigness of your Fist, place them in your Stew-pan, and then the Slices of Ham, a Couple of Carrots, an Onion cut in two, cover it close, let it stew softly at first, and as it begins to be brown, take off the Cover, and turn it to colour it on all Sides the same; but take care not to burn the Meat. it has a pretty brown Colour, moisten your Cullis with Broth made of Beef, or other Meat; leason your Cullis with a little sweet Basil, some Cloves with some Garlick; pare a Lemon, cut it into Slices, and put it into your Cullis, with tome Mushrooms. Put into a Stew-pan a good Lump of Butter, and let it over a flow Fire; put into it two or three Handfuls of Flour, stir it with a wooden Ladle, and let it take a Colour; if your Cullis be pretty brown, you must put in some Flour. Your Flour being brown with your Cullis, then pour it very foftly into your Cullis, keeping

ing your Cullis stirring with a wooden Ladle; then let your Cullis stew softly, and skim off the Fat; put in a Couple of Glasses of Champaign, or other White Wine; but take care to keep your Cullis very thin, so that you may take the Fat well off, and clarify it. To clarify it, you must put it on a Stove that draws well, and cover it close, and let it boil without uncovering, till it boils over; then uncover it, and take off the Fat that is round the Stewpan; then wipe it off the Cover also, and cover it again. When your Cullis is done, take out the Meat, and strain your Cullis through a filk Strainer. This Cullis is for all Sorts of Ragoo, Fowls, Pies, and Terrines.

#### Cullis the Italian Way.

DUT into a Stew-pan Half a Ladleful of Cullis, as much Effence of Ham, Half a Ladleful of Gravy, as much of Broth, three or four Onions cut into Slices, four or five Cloves of Garlick, a little beaten Coriander-feed, with a Lemon pared, and cut into Slices, a little fweet Basil, Mushrooms, and good Oil; put all over the Fire, let it stew a good Quarter of an Hour, take the Fat well off, let it be of a good Taste, and you may use it with all Sorts of Meat and Fish, particularly with glazed Fish. This Sauce will do for a Couple of Chickens, six Pigeons, Quails, or Ducklings, and all Sorts of Tame and Wild Fowl. Now this Italian or French Sauce, is sauce, is sauce,

#### Cullis of Crawfish.

YOU must get the middling Sort of Crawsish, put them over the Fire, seasoned with Salt, Pepper, and Onion cut in Slices: Being done, take them out, pick them, and keep the Tails after they are seased, pound the rest together in a Mortar; the more they are pounded, the finer your Cullis will be. Take a Bit of Veal, the Bigness of your Fist, with a small Bit of Ham, an Onion cut into sour, put it in to sweat gently; if it sticks but a very little to the Pan, powder it a little. Mossten it with Broth, put in it some Cloves, sweet Basil in Branches, some Mushrooms, with Lemon pared and cut in Slices. Being done, skim the Fat well; let it be of a good Taste; then take out your Meat with a Skimmer, and go on to thicken it a little, with Essence of Ham; then put in your Crawsish, and strain it off. Being strained, keep it for a First Course of Crawsish.

A White

#### A White Cullis.

AKE a Piece of Veal, cut it into small Bits, with some thin Slices of Ham, and two Onions cut into sour Pieces; moisten It with Broth, seasoned with Mushrooms, a Bunch of Parsley, green Onions, three Cloves, and so let it stew. Being stewed, take out all your Meat and Roots with a Skimmer, put in a sew Crumbs of Bread, and let it stew softly: Take the White of a Fowl, or of a Couple of Chickens, and pound it in a Mortar. Being well pounded, mix it in your Cullis; but it must not boil, and your Cullis must be very white; but if it is not white enough, you must pound two Dozen of Sweet Almonds blanched, and put into your Cullis; then boil a Glass full of Milk, and put it in your Cullis: Let it be of a good Taste, and stram it off; then put it in a small Kettle, and keep it warm. You may use it for white Loaves, white Crust of Bread, and Bisquets.

Sauce for a Brace of Partridges, Pheafants, or any Thing you please.

Pinions of four Turkeys, with a Quart of itrong Gravy, and the Livers of the Partridges, and some Truffles; let it simmer till it be pretty thick; let it stand in a Dish for a while; then pur'a Couple of Glasses of Burgundy into a Stew-pan, with two or three Slices of Onions, a Clove or two of Garlick, and the above Sauce: Let it simmer a sew Minutes; then press it through a Hair-bag into a Stew-pan; add the Essence of a Ham; let it all boil for some-time; season it with good Spices and Pepper; lay your Pattridge, Some in the Dish, and pour your Sauce in.

They will use as many fine Ingredients to shew a Pigeon, or Powl, as will make a very fine Dish, which is equal with boiling

a Leg of Mutton in Champaign.

It would be needless to name any more; though they have much more expensive Sauce than this. However, I think here is enough to shew the Folly of these sine French Cooks. In their own Country, they will make a grand Entertainment with the Expense of one of these Dishes; but here they want the little petty Prosic; and by this Sort of legerdemain Sum, fine Estates are juggled into France.

CHAP.

#### CHAP. IV.

To make a Number of pretty little Dishes, sit for a Supper, or Side-Dish, and little Corner-Dishes for a great Table; and the rest you have in the Chapter for Lent.

to stick to the Pot, take them up, put them into the Pan you would keep them in, lay a clean linnen Cloth over them, and pour melted Butter clarified over them, to keep them close from the Air. These make a pretty Plate at a Supper.

To Preserve or Pickle Pig's Feet and Ears.

TAKE your Feet and Ears fingle, and wash them well, split the Feet in two, put a Bay-Leaf between every Foot; put in almost as much Water as will cover them. When they are well steemed, add to them Cloves, Mace, whole Pepper and Ginger, Coriander-seed, and Salt, according to your Discretion; put to them a Bottle or two of Rhenish Wine, according to the Quantity you do, half a Score Bay-leaves, and a Bunch of Sweet Herbs: Let them boil sofily, till they are very tender; then take them out of the Liquor, lay them in an earthen Pot, then strain the Liquor over them; when they are cold, cover them down close, and keep them for Use.

You should let them stand to be cold; skim off all the Fat, and

then put in the Wine and Spice.

They eat well cold, or at any time heat them in the Jelly, and thicken it with a little Piece of Butter rolled in Flour, makes a very pretty Dish; or heat the Ears, and take the Feet clean out of the Jelly, and roll it in Yolk of Egg, or melted Butter, and them in Crumbs of Bread, and broil them; or fry them in fresh Butter; lay the Ears in the Middle, and the Feet round, and pour the Sauce over; or you may cut the Ears in long Slips, which is bester: And if you chuse it, make a good brown Gravy to mix with them, a Glass of White Wine and some Mustard, thickened with a Piece of Butter rolled in Flour.

#### To Pickle Ox Palates.

TAKE your Palates and wash them well with Salt and Water, and put them in a Pipkin with Water and some Salt; and when they are ready to boil, skim them well, and put to them Pepper, Cloves, and Mace, as much as will give them a quick Taste. When they are boiled tender, (which will require four five Hours) peel them and cut them into small Pieces, and let them cool; then make the Pickle of White Wine and Vinegar, an equal Quantity; boil the Pickle, and put in the Spices that were boiled in the Palates: When both the Pickle and Palates are cold, lay your Palates in a Jar, and put to them a few Bay-leaves, and a little fresh Spice; pour the Pickle over them, cover them close, and keep them for Use.

Of these you may at any time make a pretty little Dish, either with brown Sauce or white, or Butter and Mustard, and a Spoonful of White Wine, or they are ready to put in Made-Dishes.

Fowl.

A Green Peas Soop.

TAKE a fmall Knuckle of Veal, about three or four Pounds, chop it all to Pieces, set it on the Fire in fix Quarts of Water, a little Piece of lean Bacon, about Half an Ounce steeped in Vinegar an Hour, four or five Blades of Mace, three or four Cloves, twelve Pepper-corns of Black Pepper, twelve of White, a little Bundle of Sweet Herbs and Parsley, a little Piece of Upper Crust toasted crisp, cover it close, and let it boil softly over a slow Fire, till Half is wasted; then strain it off, and put to it a Pint of Green Peas, and a Lettuce cut small, four Heads of Sellery cut very finall, and washed clean. Cover it close, and let it stew very ·loftly over a flow Fire two Hours; in the mean time boil a Pint of old Peas in a Pint of Water very tender, and firain them well through a coarle Hair-fieve, and all the Pulp, then pour it into the Soop, and let it boil together. Season with Salt to your Palate, but not too much. Fry a French Roll crisp, put it in your Dish, and pour your Soop in; be thre there be full two Quarts. Mutton

Mutton Gravy will do, if you have no Veal; or a Shin of Beef chopped to Pieces: A few Aiparagus Tops are very good in it.

A White Peas Soop.

Part of the Leg chopped to Pieces; fet it on the Fire in three Gallons of Water, about Half a Pound of Bacon, a small Bundle of Sweet Herbs, a good deal of dried Mint; take a Bunch of Sellery, wash it very clean, put in the green Tops, and a Quart of Split-peas, cover it close, and let it boil till two Parts is wasted; then strain it off, and put it into a clean Sauce-pan, five or sex Heads of Sellery cut small, and washed clean, cover it close, and let it boil till there is about three Quarts; then cut some fat and least Bacon in Dice, some Bread in Dice, and fry them just crisp; throw them into your Dish, season your Soop with Salt, and pour it into your Dish, rub a little dried Mint over it, and tend it to Table. You may add Force-meat Balls fry'd, Cocks Combs boiled in it, and an Ox's Palate stewed tender and cut small. Stewed Spinach well drained, and laid round the Dish is very pretty.

Another Way to make it.

W HEN you boil a Leg of Pork, or a good Piece of Beef, fave the Liquor. When it is cold, take off the Fat, the next Day boil a Leg of Mutton, fave the Liquor, and when it is cold, take off the Fat, fet it on the Fire, with two Quarts of Peas; let them boil till they are tender, then put in the Pork or Beef Liquor, with the Ingredients as above, and let it boil till it is as thick as you would have it, allowing for the boiling again; then ftrain it off, and add the Ingredients as above. You may make your Soop of Veal or Mutton Gravy if you please, that is according to your Fancy.

A Chesnut Soop.

TAKE Half a hundred Chesnuts, pick them, put them in an Earthen Pan, and set them in the Oven Half an Hour, or roast them gently over a slow Fire; but take care they don't burn; then peel them, and set them to slew in a Quart of good Bees, Veal, or Mutton-broth, till they are quite tender. In the mean time, take a Slice or two of Ham, or Bacon, a Pound of Veal, and a Pigeon beat to Pieces, a Bundle of Sweet Herbs, an Onion, a little Pepper and Mace, a Piece of Carrot; lay the Bacon at the Bottom of a Stew-pan, and lay the Meat and Ingredients at Top, Set it over a slow Fire, till it begins to stick to the Pan, then put

in a Crust of Bread, and pour in two Quarts of Broth; let it boid I softly till one Third is wasted; then strain it off, and add it southe Chesnuts. Season it with Salt, and let it boil till it is well tasted, stew two Pigeons in it, and a fry'd French Roll crisp; layouthe Roll in the Middle of the Dish, and the Pigeons on each is Side; pour in your Soop, and send it away hor.

A French Cook will beat a Pheafant and a Brace of Partridges to Pieces, and put to it. Garnish your Dish with hot Chesnuts.

# To make Mutton Broth.

TAKE a Neck of Mutton about fix Pounds, cut it in two, boil the Scraig, in a Gallon of Water, skim it well, then put in a little Bundle of Sweet Herbs, an Onion, and a good Crust of Bread. Let it boil an Hour, then put in the other Part of the Mutton, a Turnip or two, some dried Marigolds, a few Cives chopped fine, a little Parsley chopped small; put these in about a Quarter of an Hour before your Broth is enough; season it wishes Salt, or you may put in a Quarter of a Pound of Barley, or Rice at first. Some love it thickened with Oatmeal, and some with Bread; and some love it seasoned with Mace, instead of Sweet Herbs and Onion. All this is Fancy and different Palates. If won boil Turnips for Sauce, don't boil all in the Pot, it makes them Broth too strong for them, but boil them in a Sauce pan.

# Beef Broth.

A K E a Leg of Beef, crack the Bone in two or three Parts, wash it clean; put it into a Pot with a Gallon of Water, skim it well, then put in two or three Blades of Mace, a little Bandle of Parsley, and a good Crust of Bread. Let it boil till the Beef is quite tender, and the Sinews. Toast some Bready and cut it in Dice, and lay in your Dish; lay in the Meat, and pour the Soop in.

# To make Scotch Barley Broth.

TAKE a Leg of Beef, chop it all to Pieces, boil it in three I Gallons of Water, with a Piece of Carrot and a Crust of Bread, till it is half boiled away; then strain it off, and put it in the Pot again, with Half a Pound of Barley, source five Heads of Sellery washed clean and cut small, a large Onion, a Bundle of Sweet Herbs, and a little Parsley chopped small, and a few Marigolds. Let this boil an Hour; take a Cook, or large Fowl, clean picked and washed; and put into the Pot; boil it till the Broth is quite good, then featon with Salt; and send it ter Table, with the

Fowl in the Middle. This Broth is very good without the Fowl; take out the Onion and Sweet Herbs, before you fend it to Table.

Some make this Broth with a Sheep's Head, instead of a Leg of Beef, and it is very good; but you must chop the Head all to Pieces. The thick Flank about six Pounds to six Quarts of Water, makes good Broth; but then put the Barley in with the Meat, first skim it well, boil it an Hour very softly, then put in the above Ingredients, with Turnips, and Carrots clean scraped and pared, and cut in little Pieces. Boil all together softly, till the Broth is very good; then season it with Salt, and send it to Table, with the Beef in the Middle, Turnips and Carrots round, and pour the Broth over all.

#### To make Hodge-Podge.

AKE a Piece of Beef, Fat and Lean together about a Pound, a Pound of Veal, a Pound of Scraig of Mutton, cut all into little Pieces, fet it on the Fire, with two Quarts of Water, an Ounce of Barley, an Onion, a little Bundle of Sweet Herbs, three or four Heads of Sellery washed clean, and cut small, a little Mace, two or three Cloves, some whole Pepper, tied all in a Mussin Rag, and put to the Meat three Turnips pared and cut in two, a large Carrot scraped clean, and cut in fix Pieces, a little Lettuce cut small, put all in the Pot, and cover it close. Let it stew very softly over a slow Fire sive or six Hours; take out the Spice, Sweet Herbs, and Onion, and pour all into a Soop-dish, and send it to Table; first feason it with Salt. Half a Pint of Green Peas, when it is the Season for them, is very good. If you let this boil fast, it will waste too much; therefore you cannot do it too slow, if it does but simmer: All other Stews you have in the foregoing Chapter; and Stops in the Chapter of Lent.

#### To make Pocket Soop.

TAKE a Leg of Veal, strip off all the Skin and Fat, then take all the muscular or sleshy Parts clean from the Bones. Boil this Flesh in three or four Gallons of Water till it comes to a strong Jelly, and that the Meat is good for nothing. Be live to keep the Pot close covered, and not do too fast; take a little out in a Spoon now and then, and when you find it is a good rich Jelly, strain it through a Sieve into a clean earthen Pan. When it is cold, take off all the Skim and Fat from the Top, then provide a large deep Stew-pan with Water boiling over a Stove, then take some deep China-cups; or well glazed Earthen Ware; and fill these Gups with the Jelly, which you must take clear from the Settling

Settling at the Bottom; and set them in the Stew-pan of Water. Take great Care none of the Water gets into the Cups; if it does, it will fool it. Keep the Water boiling gently all the Time till the Jelly becomes as thick as Glew, take them out and let them stand to cool, and then turn the Glew out into some new coarse Flamel, which draws out all the Moisture; turn them in fix or eight Hours on fresh Flamel, and so do till they are quite dry. Keep it in a dry warm Place, and in a little Time it will be like a dry hard Piece of Glew, which you may carry in your Pocket without getting any Harm. The best Way is to put it into little Tin Boxes. When you use it boil about a Pint of Water, and pour it on a Piece of Glew about as big as a small Wallnut, stirring it all the Time till it is melted. Season with Salt to your Palate; and if you chuse any Herbs, or Spice, boil them in the Water sirst, and then pour the Water over the Glew.

#### To make Portable Soop.

TAKE two Legs of Beef, about fifty Pounds Weight, take off all the Skin and Fat as well as you can, then take all the Meat and Sinews clean from the Bones, which Meat put into a large Pot, and put to it eight or nine Gallons of lost Water; first make it boil, then put in twelve Anchovies, an Ounce of Mace, a Quarter of an Ounce of Cloves, an Ounce of Whole Pepper Black and White together, fix large Onions peeled and cut in two, a lite tle Bundle of Thyme, Sweet Marjoram and Winter-savoury, the dry hard Crust of a Two-penny Loaf, stir it all rogether and cover it close, lay a Weight on the Cover to keep it close down, and let it boil foftly for eight or nine Hours, then uncover it, and ftir it together. Cover it close again, and let it boil till it is a very rich good Jelly, which you will know by taking a little out now and then, and letting it cool. When you think it is a thick Jelly, take it off, strain it through a coarle Hair Bag, and press it hard; then strain it through a Hair Sieve into a large earthen Pan; when it is quite cold, take off all the Skim and Fat, and take the fine Jelly clear from the Settlings at Bottom, and then put the Jelly into a large deep well-tinned Stew-pan. Set it over a Stove with a flow Fire, keep stirring it often, and take great Care it neither flicks to the Pan, or burns. When you find the Jelly is very stiff and thick, as it will be in Lumps about the Pan, take it out; and put it into large deep China Cups, or well-glazed Earthen Wate. Fill the Pan two Thirds full with Water, and when the Water boils, let in your Cups; be fure no Water gets into the Cups, and keep the Water boiling foftly all the Time, till you find the Jelly is like a shiff Glow: Take out the Cupe, and when they are cool, turn out the Glow into coarse new Flannel. Let it lay eight or nine Hours, keeping it in a dry warm Place, and turn it on fresh Flannel till it is quite dry, and the Glow will be quite hard; put it into clean new Stone Pots, keep it close covered from Dust and Dirt, in a dry Place, and where no Damp can come to it.

When you use it, pour boiling Water on it, and stir it all the Time till it is melted. Season it with Salt to your Palate. A Piece as big as a large Wallout will make a Pint of Water very rich, but as to that you are to make it as good as you please: If for Soop, fry a Freich Roll and lay in the Middle of the Dish, and when the Glew is dissolved in the Water, give it a boil, and prour it into a Dish. If you chase it, for Change, you may boil either Rice, Barley, Vermacelli, Sellery cut small, or Trusses or Morels; but let them be very tenderly boiled in the Water before you stir in the Glew, and then give it a boil all together. You may, when you would have it very fine, add Force-Mear Balls, Cocks Combs, or a Palate boiled very tender, and cut into little Bits; but it will be very rich and good without any of these Ingredients.

If for Gravy, pour the boiling Water on to what Quantity you think proper; and when it is diffolved, add what Ingredients you pleafe, as in other Sauces. This is only in the room of a rich good Gravy. You may make your Sauce either weak or fireng.

very clean, and free from all Grease and Sand, and that they be well tinned, for fear of giving the Broths or Soops any brasly Tafte. If you have Time to stew as softly as you can it will both have a finer Flavour, and the Meat will be the tenderer. But then observe, when you make Soops or Broths for present Use, if it is to be done softly, don't put much more Water than you intend to have Stoop or Broth; and if you have the Convenience of an Earthen Pan or Pipkin, and set on Wood Embers till it boils, then skinn it, and put in your Seasoning. Cover it close, and set it on Embers, so that it may do very softly for some Time, and both the Meat and Broth will be delicious. Bake it well, have ready, when it comes out of the Oven some very rich Beef Gravy, enought to fill the Pye, lay on the Crust again, and send it to Table hot. A fresh Ham will not be so tender; so that I always boil my Ham one Day and bring it to Table, and the next Day make a Pye of

it! It does better than an unboiled Ham, If you put two large Powls in they will make a fine Pye, but that is according to your Company more or lefs. The larger the Pye, the finer the Meat eats. The Crust must be the same you make for a Venison-Pasty. You should pour a little small Gravy into the Pye when you make it, just to bake the Meat, and then fill it up when it comes out of the Oven. Boil some Trussless and Morels and put into the Pye, which is a great Addition, and some fresh Mushrooms, or dried ones.

# To make a Yorkshire Christmas Pye.

be very thick; bone a Turky, a Goofe, a Fowl, a Partridge, and a Pigeon, featon them all very well, take Half an Ounce of Mace, Half an Ounce of Nutmegs, a Quarter of an Ounce of Gloves, and Half an Ounce of Black Pepper, all beat fine together, two large Spoonfuls of Salt, and then mix them together. Open the

Fowls all down the Back, and bone them; first the Pigeon, then the Partridge, cover them; then the Fowl, then the Goose, and then the Turky, which must be large; season them all well first, and lay them in the Crust, so as it will look only like a whole Turky; then have a Hare ready cased, and wiped with a clean Cloth. Cut it to Pieces, that is jointed; season it, and lay it as close as you can on one Side; on the other Side Woodcock, more Game, and what Sort of wild Fowl you can get. Season them well, and lay them close; put at least four Pounds of Butter into the Pye, then lay on your Lid, which must be a very thick one, and let it be well baked. It must have a very hot Oven, and will take at least four Hours.

This Crust will take a Bushel of Flour; in this Chapter, you will see how to make it. These Pies are often sent to London in

a Box as Presents; therefore the Walls must be well built.

#### To make a Goose Pye.

HALF a Peck of Flour will make the Walls of a Goose-pres, made as in the Receipts for Crust. Raise your Crust just big enough to hold a large Goose; first have a pickled dried Tongues boiled tender enough to peel, cut off the Root, bone a Goose, and a large Fowl; take half a Quarter of an Ounce of Mace beat fine, a large Tea Spoonful of beaten Pepper, three Tea Spoonfuls of Salt, mix all together, season your Fowl and Goose with it, then lay the Fowl in the Goose, and the Tongue in the Fowl, and the Goose in the same Form as if whole. Put Half a Pound of Butter on the Top, and lay on the Lid. This Pye is delicious, either hot or cold, and will keep a great while. A Slice of this Pye, cut down a-cross, makes a pretty little Side-dish for Supper.

#### To make a Venison Pasty.

A K E a Neck and Breast of Vention, bone it, season it with Pepper and Salt according to your Palata. Cut the Breast in two or three Pieces; but don't cut the Fat off the Neck is you can help it. Lay in the Breast and Neck End first, and the best End of the Neck on the Top, that the Fat may be whole; make a good rich Puff-paste Crust, let it be very thick on the Sides, a good Bottom Crust, and a thick Top. Cover the Dish, then lay in your Venison, put in Half a Pound of Butter, about a Quarter of a Pint of Water, close your Pasty, and let it be baked two Hours in a very quick Oven. In the mean time set on the Bones of the Venison in two Quarts of Water, with two or three Blades of Mace, an Onion, a little Piece of Crust baked crisp and brown, a little

a little whole Pepper, cover it close, and let it boil fostly over a flow Fire, till above Half is wasted, then strain it off. When the Pasty comes out of the Oven, lift up the Lid, and pour in the Grave.

When your Venison is not fat enough, take the Fat of a Loin of Mutton, steeped in a little rap Vinegar and Red Wine twentyfour Hours, then lay it on the Top of the Veniton, and close your Pasty. It is a wrong Notion of some People, to think Venison cannot be baked enough, and will first bake it in a false Crust, and then bake it in the Pasty; by this time the fine Flavour of the Venison is gone. No, if you want it to be very tender, wash it in warm Milk and Water, dry it in clean Cloths till it is very dry, then rub it all over with Vinegar, and hang it in the Air. it as long as you think proper, it will keep thus a Fortnight good; but be sure there be no Moistness about it; if there is, you must dry it well, and throw Ginger over it, and it will keep a long Time. When you use it, just dip it in lukewarm Water, and dry it. Bake it in a quick Oven; if it is a large Pasty, it will take three Hours; then your Venilon will be tender, and have all the fine Flavour. The Shoulder makes a pretty Pasty boned, and made as above with the Mutton Pat.

of Mutton makes a fine Pasty: Take a large fat Loin of Mutton, let it hang four or five Days, then hone it, leaving the Meat as whole as you can, lay the Meat twenty-four Hours in Half a Pint of Red Wine, and Half a Pint of rap Vinegar, then take it out of the Pickle, and order it as you do a Pasty, and boil the Bones in the same manner to fill the Pasty, when it comes out

of the Oven.

When you make your Pies, take a little Dish, something bigger than a Soop-plate, lay a very thin Crust all over it, lay a thin Layer of Meat, and then a thin Layer of Citron cut very thin, then a Layer of Mince-meat, and a thin Layer of Orange-peel cut thin, over that a little Meat; squeeze half the Juice of a fine Seville Orange, or Lemon, and pour in three Spoonfuls of Red Wine; lay on your Crust, and bake it nicely. These Pies eat finely cold. If you make them in little Patties, mix your Meat and Sweet-meats accordingly. If you chuse Meat in your Pies, parboil a Neat's-Tongue, peel it, and chop the Meat as fine as possible, and mix with the rest; or two Pounds of the Inside of a Surloin of Beef boiled.

#### Tort de Moy.

AKE Puff-paste, and lay round your Dish, then a Layer of Biscuit, and a Layer of Butter and Marrow, and then a Layer of all Sorts of Sweet-meats, or as many as you have, and so do till your Dish is full; then boil a Quart of Cream, and thicken it with four Eggs, and a Spoonful of Orange-flower Water. Boil these together a Quarter of an Hour, then put it in a Gallipot, and iqueeze an Orange in it: If it be Lemon-Tart, squeeze a Lemon; two Spoonfuls is enough for a Tart. Your Patty-pans must be small and shallow. Put fine Puff-paste, and very thin; a little while will bake it. Just as your Tarts are going into the Oven, with a Feather, or Brush, do them over with melted Butter, and then fift double-refined Sugar over them; and this is a pretty Iceing on them.

#### To make different Sorts of Tarts.

IF you bake in Tin Patties, butter them, and you must put a little Crust all over, because of the taking them out : If in China, or Glass, no Crust but the Top one. Lay fine Sugar at the Bottom, then your Plumbs, Cherries, or any other Sort of Fruit, and Sugar at Top; then put on your Lid, and bake them in a flack Oven. Mince-pies must be baked in Tin-patties, because of taking them out, and Puff-paste is best for them. All sweet Tarts the beaten Crust is best; but as you fancy. You have the Receipt for the Crusts in this Chapter. Apple, Pear, Apricot, &c. make thus: Apples and Pears, pare them, cut them in Quarters, and core them; cut the Quarters a-crois again, fet them on in a Sauce-pan with just as much Water as will barely cover them, letthem simmer on a slow Fire just till the Fruit is tender; put a good Piece of Lemon-peel in the Water with the Fruit, then have your Patties ready. Lay fine Sugar at Bottom, then your Fruit, and a little Sugar at Top; that you must put in at your Discretion Pour over each Tart a Tea Spoonful of Lemon-juice, and three Tea Spoonfuls of the Liquor they were boiled in; put on your Lid, and bake them in a flack Oven. Apricots do the fame Way; only don't use Lemon.

As to preferved Tarts, only lay in your preferved Fruit, and put a very thin Crust at Top, and let them be baked as hittle as possible; but if you would make them nice, have a large Patty, the Size you would have your Tart. Make your Sugar-Crust, roll it as thick as a Halfpenny; then butter your Patties, and cover it; shape your Upper-crust on a hollow Thing on purpose, the Size of your Patty, and mark it with a Marking; iron for that purpose, in what Shape you please, to be hollow and open to see the Fruit through; then bake your Crust in a very slack Oven, not to discolour it, but to have it crisp. When the Crust is cold, very carefully take it out, and fill it with what Fruit you please, lay on the Lid, and it is done; therefore if the Tart is not eat,

your Sweet meat is not the worse, and it looks genteel.

This is a fine Side-dish at a Second Course.

#### To butter Lobsters another Way.

ARBOIL your Lobsters, then break the Shells, pick out all the Meat, cut it small, take the Meat out of the Body, mix it fine with a Spoon in a little White Wine: For Example, a small Lobster, one Spoonful of Wine, put it into a Sauce pan with the Meat of the Lobster, four Spoonfuls of White Wine, a Blade of Mace, a little beaten Pepper and Salt. Let it stew all together a few Minutes, then stir in a Piece of Butter, shake your Sauce-pan round till your Butter is melted, put in a Spoonful of Vinegar, and strew in as many Crumbs of Bread as will make it thick enough. TAKE three Lobsters, boil the largest as above, and froth it before the Fire; take the other two boiled, and butter them as in the foregoing Receipt. Lay the large Lobster in the Middle, and the two Shells on each Side; and the two great Claws of the middle Lobster at each End; and the four Pieces of Chines of the two Lobsters broiled, and haid on each End. Let them be of a sine Brown, keeping them turning, to be brown all over alike; but a Tin Oven does them best before the Fire. They eat much

much the best done this Way, though most People stew the Oy-sters first in a Sauce-pan, with a Blade of Mace, thickened with a Piece of Butter, and fill the Shell, and then cover them with Crumbs, and brown them with a hot Iron.---But the Bread has not the fine Taste of the former.

## To few Mussels.

WASH them very clean from the Sand in two or three Waters, put them into a Stew-pan, cover them close, and let them flew till all the Shells are opened, then take them out one by one, pick them out of the Shell, and look under the Tongue to see if there be a Crab; if there is, you must throw away the Mussel; some will only pick out the Crab, and eat the Mussel. #### To Pickle or Bake Herrings.

Rows, or wash them clean, cut off the Heads, take out the Rows, or wash them clean, and put them in again just as you like; season them with a little Mace and Cloves beat, a very little beaten Pepper and Salt, lay them in a deep Pan, lay two or three Bay-leaves between each Lay; then put in half Vinegar and half Water, or rap Vinegar. Cover it close with a brown Paper, and send it to the Oven to bake; let it stand till cold, then pour off that Pickle, and put fresh Vinegar and Water, and send them to the Oven again to bake. Thus do Sprats; but don't bake them the second Time. Some use only All spice, but that is not so good.

To Pickle or Bake Mackrel, to keep all the Year.

little Bay Salt beat fine, take a little beaten Mace, a few Cloves beat fine, black and white Pepper beat fine; mix a little Salt, fub them infide and out with the Spice, lay them in the Pan, and bestween every Lay of the Mackrel put a few Bay-leaves; then cover them with Vinegar, tye them down close with brown Paper, put them into a flow Oven; they will take a good while doing; when they are enough, uncover them, let them stand till cold, then pour away all that Vinegar, and put as much good Vinegar as will cover them, and put in an Onion stuck with Cloves: Send them to the Oven again, let them stand two Hours in a very slow Oven, and they will keep all the Year; but you must not put in your Hands to take out the Mackrel, if you can avoid it, but take a Slice to take them out with. The great Bones of the Mackrel taken out and broiled, is a pretty little Plate to fill up a Corner of a Table,

#### To Soule Mackrel

Then set some fresh Butter in a deep broad Pan before the Fire, and when it is all melted, take off the Scum at the Top, if any, and pour the clear Butter over the Meat as thick as a Crown-piece. The Whey and Churn Milk will settle at the Bottom of the Pan; but take great Care none of that goes in, and always let your Butter be very good, or you will spoil all. Or only put the Tails, laying them as close together as you can, and pour the Butter over them. You must be sure to let the Lobster be well boiled.

#### To Pot Eels.

The AKE a large Eel, skin it, cleanse it, and wash it very clean, dry it in a Gloth, and cut it into Pieces as long as your Finger. Season them with a little beaten Mace and Nutneg, Peppers, Salt, and a little Sal Prunella beat fine; lay them in a Pan, then pour as much good Butter over them as will cover them, and clarified as above. They must be baked Half an Hour in a quick Oven; if a slow Oven, longer, till they are enough: With a Fork take them out, and lay them on a coarse Cloth to drain. When they are quite cold, season them again with the same Seasoning, lay them in the Pot close, then take off the Butter they were baked in clear from the Gravy of the Fish, and set in a Dish before the Fire. When it is melted, pour the clear Butter over the Eels, and let them, be covered with the Butter. As to the baking, you must judge by the Largeness of the Eel.

In the same Manner you may Pot what you please. You may bone your Eels, if you chuse it; but then don't put in any Sal

Prunella.

#### To Pot Lampreys.

Skin them, cleanse them with Salt, and then wipe them dry:
Beat some Black Pepper, Mace, and Cloves; mix them with Salt, and season them. Lay them in a Pan, and cover them with clarified Butter. Bake them an Hour, order them as the Eels, only let them be well seasoned, and one will be enough for a Pot. You must season them well, let your Butter be good, and they will keep a long Time.

Take two Nutmege, an Ounce of Mace and Cloves beaten, Half an Ounce of White Pepper, and an Ounce of Salt; then take out all the Bones, cut off the Jole below the Fins, and cut off the Tail. Season the scaly Side first, lay that at the Bottom of the Pot, then rub the Seasoning on the other Side, cover it with a Dish, and let it stand all Night. It must be put double, and the scaly Stde, Top and Bottom; put Butter Bottom and Top, and cover the Pot with some stiff coarle Paste. Three Hours will bake it, if a large Fish; if a small one, two Hours; and when it comes out of the Oven, let it stand Half an Hour; then uncover it, and raise A up at one End, that the Gravy may run out; then put a Trencher and a Weight on it, to press out the Gravy. When the Butter is cold, take it out clear from the Gravy, add some more to it, and put it in a Pan before the Fire; when it is melted, pour it over the Salmon; and when it is cold, paper it up. As to the Seafoning of these Things, it must be according to your Palate, more or less.

#### To boil a Scraig of Veal.

SET on the Scraig in a clean Sauce pan: To each Pound of Veal put a Quart of Water, skim it very clean, then put in a good Piece of Upper-crust, a Blade of Mace to each Pound, and a little Parsley tyed with a Thread. Cover it close, then let it boil very softly two Hours, and both Broth and Meat will be fit to eat.

#### To make Beef or Mutton Broth for very weak People, who take but little Nourishment.

TAKE a Pound of Beef, or Mutton, or both together: To a Pound put two Quarts of Water, first skin the Meat, and take off all the Fat; then cut it into little Pieces, and boil it till it comes to a Quarter of a Pint. Season it with a very little Corn of Salt, akim off all the Fat, and give a Spoonful of this Broth at a Time. To very weak People Half a Spoonful is enough. To some a Tea Spoonful at a Time; and to others a Tea Cup full. There is greater Nourishment from this than any Thing else.

To make Beef Drink, which is ordered for weak 

TAKE a Pound of lean Beef, then take off all the Fat and Skin, cut it into Pieces, put it into a Gallon of Water with the Under-crust of a Penny Loaf, and a very little Salt. Let le boil till it comes to two Quarts. Then strain it off, and it is a very hearty Drink.

#### To make Pork Broth.

TAKE two Pounds of young Pork, then take off the Skin and Fat, boil it in a Gallon of Warer with a Turnip, and a very little Corn of Salt. Let it boil till it comes to two Quarts, then strain it off, and let it stand till cold. Take off the Pat, then leave the Settling at the Bottom of the Pan, and drink Half a Pint in the Morning failing, an Hour before Breakfailt; and at Noon, if the Stomach will bear it.

To boil a Chicken, will be a second to the second

LET your Sauce-pan be very clean and nice; when the Water boils put in your Chicken, which must be very nicely pinked and clean, and laid in cold Water a Quarter of an Hour before it is boiled; then take it up out of the Water holling, and layrenin a Pewter-dish. Save all the Liquor that runs from it in the Disk, cut up your Chicken all in Joints in the Dish, then bruise the Liver very fines add a little boiled Parsley chopped very fine, a very little Salt, and a very little grated Nutmeg; Mix it all well together with two Spoonfuls of the Liquor of the Fowl, and pour it into the Dish with the rest of the Liquor in the Dish. If there is not Liquor enough, take two or three Spoonfuls of the Liquor it was boiled in, clap another Dish over it, then set it over, a Chaffing-dish of hot Coals five or fix Minutes, and carry it to Table hot with the Cover on. This is better than Butter, and lighter for the Stomach, though some chuse it only with the Liquor, and no Parsley, nor Liver, or any Thing else; and that is according to different Palates. If it is for a very weak Person, take off the Skin of the Chicken before you fet it on the Chaffingdish. If you roast it, make nothing but Bread Sauce, and that is lighter than any Sauce you can make for a weak Stomach.

Thus you may dress a Rabbit, only bruise; but a little Place of the Liver. To boil Pigeons.

ET your Pigeons be cleaned, washed, drawn, and skinned:
Boil them in Milk and Water ten Minutes, and pour over
them Sauce made thus. Take the Livers parboiled, and bruise
them fine with as much Parsley boiled and chopped fine. Melt
some Butter, mix a little with the Liver and Parsley first, then
mix all together, and pour over the Pigeons.

#### To boil a Partridge, or any other Wild Fowl.

HEN your Water boils, put in your Partridge, let it boil ten Minutes, then take it up into a Pewter-plate, and cut it in two, laying the Infides next the Plate, and have ready some Bread-Sauce made thus. Take the Crumb of a Halfpenny Roll, or thereabouts, and boil it in Half a Pint of Water with a Blade of Mace. Let it boil two or three Minutes, pour away most of the Water, then beat it up with a little Piece of nice Butter, a little Salt, and pour it over the Partridge. Clap a Cover over it, then set it over a Chaffing-dish of Coals sour or sive Minutes, and send it away hot covered close.

Thus you may dress any Sort of Wild Fowl, only boiling it more or less according to the Bigness. Ducks, take off the Skins before you pour the Bread-Sauce over them; and if you roast them, lay Bread-Sauce under them. It is lighter than Gravy for

weak Stomachs.

Let it boil, but not too fast; it will take near two Hours boiling; and when it is enough, take it up, put it in your Souting-pan, and when the Pickle is cold, put it to your Salmon, and let it stand in it till used. Or you may pot it, after it is boiled, pour clarified Butter over it, it will keep longest so; but either way is good. If you pot it, be sure the Butter be the nicest you can get.

Cheefe-press a Day and a Night, and hang it to dry in a Chimney. When you boil it, you must put it in a Cloth; when it is cold, it will cut in Slivers as Dusch Beef.

#### To make Sham Brawn.

BOIL two Pair of Neat's Feet tender, take a Piece of Pork of the thick Flank, and boil it almost enough, then pick off the Flesh of the Feet, and roll it up in the Pork tight, like a Collar of Brawn; then take a strong Cloth and some coarse Tape, roll it tight round with the Tape, then tye it up in a Cloth, and boil it till a Straw will run through it; then take it up, and hang it up in a Cloth till it is quite cold; then put it into some Sousing Liquor, and use it at your own pleasure.

When it is enough, take it out, and tye it tighter. Let the Liquor boil a little longer; and if you think the Pickle wants more Vinegar or Salt, add it when it is cold, pour it upon the Turkey. It will keep some Months, covering it close from the Air, and keeping it in a dry cool Place. Eat it with Oil, Vinegar and Sugar, just as you like it. Some admire it more than Sturgeon; it looks pretty covered with Fennel for a Side-dish.

## To pickle Pork.

BONE your Pork, cut it into Pieces, of a Size sit to lye in the Tub or Pan you design it to lye in, rub your Pieces well with Salt-petre, then take two Parts of common Salt, and two of Bay-salt, and rub every Piece well; lay a Layer of common Salt in the Bottom of your Vessel, cover every Piece over with common Salt, lay them one upon another as close as you can, filling the hollow Places on the Sides with Salt. As your Salt melts on the Top, strew on more, lay a coarse Cloth over the Vessel, a Board over that, and a Weight on the Board to keep it down. Keep it close covered; it will thus ordered keep the whole Year. Put a Pound of Salt-petre, and two Pounds of Bay-salt to a Hog.

You may cut a Piece off as you have Occation, and either boil it or cut it in Rathers, and broil it with poached Eggs, or boil a Piece, and it eats fine cold, and will Thiver like Dutch Beef. After this Beef is done, you may do a thick Bristuit of Beef in the same Pickle. Let it lay a Month, rubbing it every Day with the Pickle, then boil it till it is tender, hang it in a dry Place, and it eats finely cold cut in Slices on a Plate. It is a pretty Thing for a Side dish, or for Supper. A Shoulder of Mutton laid in this Pickle a Week, hung in Wood-Smoke two or three Days, and then boiled with Cabbage, is very good. To

Take an Ounce of Salt-petre, a Pound of coarse Sugar, and a Pound of common Salt; mix all together, and rub it well: Let it lye a Month in this Pickle, turning and basting it every Day, then hang it in Wood-Smoke as you do your Beef in a dry Plate, so as no Heat comes to it; and if you keep them long, hang them a Month or two in a damp Place, so as they will be mouldy, and it will make them cut fine and short. Never lay these Hams in Water till you boil them, and then boil them in a Copper, if you have one, or the biggest Pot you have. Put them in the cold Water, and let them be four or five Hours before they boil. Skim the Pot well and often, till it boils. If it is a very large one, two Hours will boil it; if a small one, an Hour and I Half will do, provided it be a great while before the Water boils. Take it up Half an Hour before Dinner, pull off the Skin, and throw Raipings finely fifted all over; hold a red hot Fire-shovel over it, and when Dinner is ready take a few Raspings in a Sieve and fift all over the Dish; then lay in your Ham, and with your Finger make fine Figures round the Edge of the Dish. Be sure to boil your Ham in as much Water as you can, and to keep it skimming all the Time till it boils. It must be at least four Hours

This Pickle does finely for Tongues afterwards to lye in it a Fortnight, and then hang in the Wood-Smoke a Fortnight, or to

boil them out of the Pickle.

Torksbire is famous for Hams; and the Reason is this: Their Salt is much finer than ours in London, it is a large clear Salt, and gives the Meat a fine Flavour. I used to have it from Malding in Esex, and that Salt will make any Ham as fine as you can defire. It is by much the best Salt for salting of Meat. A deephollow wooden Tray is better than a Pan, because the Pickle swells best about it.

W hen

When you broil any of these Hams in Slices or Bacon, have fome boiling Water ready, and let the Slices lay a Minute or two in the Water, then broil them, it takes out the Salt, and makes them eat finer.

#### To make Bacon.

T A K E a Side of Pork, then take off all the infide Fat, lay it on a long Board or Dreffer, that the Blood may run away, rub it well with good Salt on both Sides, let it lye thus a Week, then take a Pint of Bay-falt, a Quarter of a Pound of Salt-petre, beat them fine, two Pounds of coarse Sugar, and a Quarter of a Peck of common Salt. Lay your Pork in something that will hold the Pickle, and rub it well with the above Ingredients. Lay the skifting Side downwards, and baste it every Day with the Pickle for a Formight. Then hang it in Wood-Smoke as you do the Beef, and afterwards hang it in a dry Place, but not hot. You are to observe, that all Hams and Bacon should hang clear from every Thing, and not against a Wall.

Observe to wipe off all the old Salt before you put it into this Pickle, and never keep Bacon nor Hams in a hot Kitchen, or in a

Room where the Sun comes. It makes them all rufty.

## To save Potted Birds, that begins to be bad.

Set a large Sauce-pan of clean Water on the Fire, when it boils, take off the Butter of the Top, then take the Fowls out one by one, throw them into that Sauce-pan of Water Half a Minute, whip it out, and dry it in a clean Cloth infide and out; fo do all till they are quite done. Scald the Pot clean, when the Birds are quite cold, feafon them with Mace, Pepper and Salt to your Mind, put them down close in the Pot, and pour clarified Butter over them.

To pickle Wallnuts Green.

T AKE the largest and clearest you can get, pare them as thin as you can, have a Tub of Spring-Water stand by you, and throw them in as you do them. Let them thand all Night, then pour that Vinegar from them into a Copper or Bell-Metal Skillet, with a Pound of Bay-falt, fet it on the Fire, let it boil, then pour it hot on your Nuts, tye them over with a Woollen Cloth, and let them stand a Week; then pour that Pickle away, rub your Nuts clean with a Piece of Flannel, then put them again in your Jar, with Vine Leaves as above, and boil fresh Vinegar. Put into your Pot to every Gallon of Vinegar, a Nutmeg fliced, cut four large Races of Ginger, a Quarter of an Ounce of Mace, a Quarter of an Ounce of Cloves, a Quarter of an Ounce of Whole Black Pepper, the like of Ordingal Pepper; then pour your Vinegar boiling hot on your Wallnuts, and cover them with a Woollen Cloth. Let it stand three or four Days; so do two or three Times, when cold, put in Half a Pint of Mustard-Seed, a large Stick of Horie-raddish fliced, tye them down close They will be fit to with a Bladder, and then with a Leather. eat in a Fortnight. Take a large Onion, stick the Cloves in, and lay in the Middle of the Por.

#### To pickle Wallnuts White.

T AKE the largest Nuts you can get, just before the Shell begins to turn, pare them very thin, till the White appears, and throw them into Spring-Water, with a Handful of Salt as

you do them. Let them stand in that Water fix Hours, lay on them a thin Board to keep them under the Water, then let a Stewpan on a Charcoal Fire, with clean Spring-Water, take your Nuts out of the other Water, and put them into the Stew-pan. them fimmer four or five Minutes, but not boil, then have ready by you a Pan of Spring-Water, with a Handful of White Salt in it, stir it with your Hand till the Salt is melted, then take your Nuts out of the Stew-pan with a Wooden Ladle, and put them into the cold Water and Salt. Let them stand a Quarter of an Hour, lay the Board on them as before, if they are not kept under the Liquor they will turn Black, then lay them on a Gloth, and cover them with another to dry; then carefully wipe them with a fost Cloth, put them into your Jar or Glass with some Blades of Mace, and Nutmeg fliced thin. Mix your Spice between your Nuts, and pour distilled Vinegar over them. your Glass be full of Nuts, pour Mutton Fat over them, and tye a Bladder, and then a Leather.

### To pickle Wallnuts Black.

Y O U must take large full-grown Nuts at their full Growth, before they are hard, lay them in Salt and Water, with a little Piece of Allum. Let them lye two Days, then shift them into fresh Water; let them lye two Days longer, then shift them again, and let them lye three Days; then take them out of the Water, and put them into your Pickling-pot. When the Pot is Half full, put in a large Onion stuck with Cloves. To a Hundred of Wallnuts, put in Half a Pint of Mustard Seed, a Quarter of an Ounce of Mace, Half an Ounce of Black Pepper, Half an Ounce of Allspice, fix Bay Leaves, and a Stick of Horse-raddish; then fill your Pot, and pour boiling Vinegar over them. Cover them with a Plate, and when they are cold tye them down with a Bladder and Leather, and they will be fit to eat in two or three Months. The next Year, if any remains, boil up your Vinegar again, and skim it; when cold, pour it over your Wallnuts. This is by much the best Pickle for Use, therefore you may add more Vinegar to it, what Quantity you please. If you pickle a great many Wallnuts, and eat them fast, make your Pickle for a Hundred or two, the rest keep in a strong Brine of Salt and Water boiled till it will bear an Egg, and as your Pot empties, fill them up with those in the Salt and Water. Take care they are covered with Pickle.

T.

....

In the same Manner you may do a smaller Quantity. But if you can get rap Vinegar, use that instead of Salt and Water. Do them thus; put your Nuts into the Pot you intend to pickle them in,

throx

throw in a good Handful of Salt, a little Piece of Allum, and fill the Pot with rap Vinegar; cover it close, and let them stand a Fortnight; then pour them out of the Pot, wipe it clean, and just rub the Nuts with a coarse Cloth, and then put them in the Jar with the Pickle as above. If you have the best Sugar-Vinegar of your own making, you need not boil it the first Year, but pour it on cold; and the next Year, if any remains, boil it up again, skim it, put fresh Spice to it, and it will do again.

To pickle Gerkins.

TAKE what Quantity of Cucumbers you think fit and put them in a Stone Jar, then take as much Spring Water as you think will cover them: To every Gallon of Water put as much Salt as will make it bear an Egg; fet it on the Fire, and let it boil two or three Minutes, then pour it on the Cucumbers and cover them with a Pewter Dish, and over that a woollen Cloth; tye them down close, and let them stand twenty-four Hours, then take them out, lay them in a Cloth, and another over them to dry them. When they are pretty dry, wipe your Jar out with a dry Cloth, put your Cucumbers in, and with them a little Dill and Fennel, a very small Quantity. For the Pickle, to every three Quarts of Vinegar, one Quart of Spring Water, till you think you have enough to cover them; put in a little Bay-falt and a little white Salt, but not too much. To every Gallon of Pickle put one Nutmeg cut in Quarters, a Quarter of an Ounce of Cloves, a Quarter of an Ounce of Mace, a Quarter of an Ounce of whole Pepper, and a large Race of Ginger fliced; boil all these together in a Bellmetal or Copper Pot, pour it boiling hot on your Cucumbers, and cover them as before. Let them stand two Days, then boil your Pickle again, and pour it on as before, and a third time, when they are cold cover them with a Bladder and then a Leather. Mind always to keep your Pickles close cover'd, and never take them out with any Thing but a wooden Spoon, or one for the Purpose. This Pickle will do the next Year, only boiling it up again,

You are to observe to put the Spice in the Jar with the Cucumbers, and only boil the Vinegar, Water and Salt, and pour over them. The boiling of your Spice in all Pickles spoil them, and

loses the fine Flavour of the Spice.

## To pickle Large Cucumbers in Slices.

TAKE the large Cucumbers before they are too ripe, flice them the Thickness of Crown-pieces into a Pewter Dish: To every Dozen of Cucumbers slice two large Onions thin, and so on till

you have filled your Dish, with a Handful of Salt between every Row; then cover them with another Pewter Dish, and let them stand twenty-four Hours; then put them in a Cullender, and let them drain very well; put them into a Jar, cover them over with White Wine Vinegar, and let them stand four Hours; pour the Vinegar from them into a Copper Sauce-pan, and boil it with a little Salt; put to the Cucumbers a little Mace, a little whole Pepper, a large Race of Ginger sliced, and then pour the boiling Vinegar on. Cover them close, and when they are cold, tye them down. They will be fit to eat in two or three Days.

## To pickle Asparagus.

It must be made the Day before you tun it up, stir it well together, and stop it close, let it stand two Months to clear, then bottle it up. It will keep three Years, and is the better for keepings.

### To make Elder-Flower Wine very like Fontineac,

TAKE fix Gallons of Spring-water, twelve Pounds of white Sugar, fix Pounds of Raifins of the Sun chopped, boil these together one Hour, then take the Flowers of Elder, when they are falling, and rub them off to the Quantity of Half a Peck. When the Liquor is told, put them in, the next Day put in the Juice of three Lemons, and four Spoonfuls of good Ale Yeaft. Let it stand covered up two Days, then strain it off, and put it in a Vessel fit for it. To every Gallon of Wine, put a Quart of Rhenish, and put your Bung lightly on a Fortnight, then stop it down close Let it stand fix Months; and if you find it is sine, bottle it off.

# To make Gooseberry Wine.

ATHER your Gooseberries in dry Weather, when they are half ripe, pick them, and bruise a Peck in a Tub, with a wooden Mallet; then take a Horse-hair Cloth, and press them as much as possible, without breaking the Seeda. When you have pressed out all the Juice, to every Gallon of Gooseberries, put three Pounds of fine dry Powder-sugar, stir it together till the Sugar is all dissolved, then put it in a Vessel or Cask, which must be quite full. If ten or twelve Gallons, let it stand a Portnight; if a twenty Gallon Cask, let it stand five Weeks. Set it in a coal Place, then draw it off from the Lees, clear the Vessel of the Lees; and pour in the clear Liquor again. If it be a ten Gallon Cask, let it stand three Months; if a twenty Gallon, sour or sive Months, then bottle it off.

#### To make Current Wine.

ATHER your Currants of a fine dry Day, when the Fruit is full ripe, strip them, put them in a large Pan, and bruise them with a wooden Pestle, till they are all bruised. Let them stand in a Pan or Tub twenty-four Hours to soment; then run it through a Hair Sieve, and don't let your Hand touch your Liquor. To every Gallon of this Liquor, put two Pounds and a Half of white Sugar, stir it well together, and put it into your Vessel. To every six Gallons, put in a Quart of Brandy, and let it stand six Weeks. If it is sine, bottle it; if it is not, draw it off, as clear as you can, into another Vessel, or large Bottles; and in a Fortnight, bottle it in small Bottles.

To make Cherry Wine.

PULL your Cherries when full ripe, pull off the Stalks, and press them through a Hair-sieve; to every Gallon of Liquor put two Pounds of lump Sugar beat fine, stir it together and put into a Vessel, it must be full; when it has done working and making any Noise, stop it close for three Months, and bottle it off.

#### To make Birch Wine.

HE Season for procuring the Liquor from the Birch Trees is in the Beginning of March, while the Sap is rising, and before the Leaves shoot out; for when the Sap is come forward, and the Leaves appear, the Juice by being long digested in the Bark, grows thick and colour'd, which before was thin and clear.

The Method of procuring the Juice is by boring Holes in the Body of the Tree, and putting in Fossets, which are commonly made of the Branches of Elder, the Pith being taken out, you may without hurting the Tree, if large, tap it in several Places, four or five at a Time, and by that Means save from a good many Trees several Gallons every Day; if you have not enough in one Day, the Bottles in which it drops must be cork'd close, and rofin'd or wax'd; however make use of it as soon as you can.

Take the Sap and boil it as long as any Scurn rifes, skimming at all the Time; to every Gallon of Liquor put four Pound of good Sugar, the thin Peel of a Lemon, boil it afterwards Half an Hoar fcupming it very well, your it into a clean Tub, and when it is almost cold, fet it to work with Yeast spread on a Toast, let it stand five or six Days, stirring it often; then take such a Cask as will hold the Liquor, sire a large March dipt in Brimstone, and throw it into the Cask, stop it close till the March is extinguished.

guish'd, tun your Wine, lay the Bung on light till you find it has done working, then stop it close and keep it three Months, then bottle it off.

### To make Quince Wine.

ATHER the Quinces when dry and full ripe, take twenty large Quinces, wipe them clean with a coarse Cloth, and grate them with a large Grater or Rasp as near the Gore as you can, but none of the Core; boil a Gallon of Spring Water, throw in your Quinces, let it boil softly about a Quarter of an Hour, then strain them well into an Earthen Pan on two Pounds of double resin'd Sugar, pare the Peel of two large Lemons, throw in and squeeze the Juice in through a Sieve, itir it about till it is very cool, then toast a little Bit of Bread very thin and Brown, tub a little Yeast on it, let it stand close cover'd twenty-four Hours, then take out the Toast and Lemon, put it up in a Cag, and keep it three Months, then bottle it. If you make a twenty Gallon Cask let it stand six Momths before you bottle it; when you strain your Quinces, you are to wring them hard in a coarse Cloth.'

# To make Cowflip or Clary Wine.

AKE fix Gallons of Water, twelve Pounds of Sugar, the Juice of fix Lemons, the Whites of four Eggs beat very well, put all together in a Kettle, let it boil Half an Hour, skim it very well, take a Peck of Cowflips, if dry ones Half a Peck, put them into a Tub with the thin peeling of the fix Lemons, then pour on the boiling Liquor, and fitr them about; when almost cold, put in a thin Toast baked dry, and rubb'd with Yeast, let it stand two or three Days to work. If you put in before you tun it fix Ounces of Syrup of Citron or Lemons, with a Quart of Rhenish Wine, it will be a great Addition; the third Day strain it off, and squeeze the Cowslips through a coarse Cloth, then strain it through a Flannel-bag and tun it up, lay the Bung loose for two or three Days to lee if it works, and if it don't bung it down tight, let it stand three Months, then bottle it.

# To make Turnip Wine.

TAKE a good many Turnips, pare them, flice them, put them in a Cycler press, and press out all the Juice very well. To every Galkon of Juice, have three Pounds of Lump Sugar, have a Vessel seady, just big enough to hold the Juice, put your Sugar into the Vessel; and also to every Gallon of Juice Half a Pint of Brandy.

Brandy. Pour in the Juice, and lay formething over the Bung for a Week, to fee if it works. If it does, you must not bung it down till it has done working, then stop it close for three Months, and draw it off into another Vessel. When it is fine, bottle it off.

# To make Rasberry Wine.

AKE some fine ripe Rasberries, bruise them with the Back of a Spoon, then strain them through a Flannel Bag into a Stone Jar. To each Quart of Juice, put a Pound of double refined Sugar, stir it well together, and cover it close: Let it stand three Days, then pour it off clear. To a Quart of Juice put two Quarts of White Wine, bottle it off, it will be sit to drink in a Week. Brandy made thus is a very sine Dram, and a much better Way than steeping the Rasberries.

# Rules for Brewing.

ARE must be taken in the first place to have the Malt clean; and after it is grinded, it ought to stand four or five Days.

For strong October, five Quarters of Male to three Hogsheads, and twenty-four Pounds of Hops. This will afterwards make two Hogsheads of good keeping small Beer, allowing five Pounds of

Hops to it.

For good middling Beer, a Quartern of Malt makes a Hogf-head of Ale, and one of Small Beer; or it will make three Hogf-heads of good Small Beer, allowing eight Pounds of Hops. This will keep all the Year; or it will make twenty Gallons of strong Ale, and two Hogsheads of Small Beer, that will keep all the Year.

If you intend your Ale to keep a great while, allow a Pound of Hops to every Bushel; if to keep fix Months, five Pounds to a Hogshhead; if for present drinking, three Pounds to a Hogshead, the softest and clearest Water you can get.

Observe the Day before to have all your Vessels very clean, and never use your Tubs for any Use, except to make Wines.

Let your Casks be very clean the Day before with boiling Water; and if your Bung is big enough, scrub them well with a little Birch Broom or Brush; but if they be very bad, take out the Heads, and let them be scrubbed clean with a Hand-Brush and Sand, and Fuller's Earth. Put on the Head again and scald them well, throw into the Barrel a Piece of unslacked Lime, and stop the Bung close.

The first Copper of Water, when it boils, pour into your Mashtub, and let it be sool enough to see your Face in when put in

your

your Male, and let it be well mashed, have a Copper of Water boiling in the mean Time, and when your Malt is well mashed. fill your Mashing-tub; stir it well again, and cover it over with the Sacks: Let it stand three Hours, then fex a broad shallow Tub under the Cock, let it run very softly, and if it is thick throw it up again till it runs fine, then throw a Handful of Hops in the under Tub, and let the Math run into it, and fill your Tubs till all is run off. Have Water boiling in the Copper, and lay as much more on as you have Occasion for, allowing one Third for boiling and waste. Let that stand an Hour, boiling more Water to fill the Math-tub for Small Beer; let the Fire down a little, and put it into Tubs enough to fill your Mash. Let the second Mash be run off, and fill your Copper with the first Wort; put in Part of your Hops, and make it boil quick. About an Hour is long enough. When it is Half boiled, throw in a Handful of Salt. Have a clean white Wand and dip it into the Copper, and if the Wort feels clammy it is boiled enough, then flacken your Fire and take off your Wort. Have ready a large Tub, put two Sticks across, and fet your straining Basket over the Tub on the Sticks, and strain your Wort through ir. Put your other Wort on to boil with the rest of the Hops; let your Mash be still covered again with Water; and thin your Wort that is cooled in as many Things as you can; for the thinner it lies, and the quicker it cools, the bette. When quite cool, put it into the Tunning-rub. Mind to throw a Handful of Salt into every Boil. When the Mash has stood an Hour draw it off, then fill your Mash with cold Water, take off the Wort in the Copper, and order it as before. When cool, add to it the first in the Tip; so soon as you empty one Copper fill the other, so boil your Small Beer well. Let the last Mash run off, and when both are boiled with fresh Hope, order them as the two First Boilings; when coul, empty the Math-tub, and pue the Small Beer to work there. When cool enough, work it, for a wooden Rowl of Yeast in the Beer, and it will work over with a little of the Beer-in the Boil. Stir your Tun up every twelve Hours, let it stand two Days, then tun it, taking off the Yeast. Fill your Vessels full, and fave some to fill your Barrels; let it stand till it has done working, then lay on your Bung lightly for a Fortnight; after that stop it as close as you can. Mind you have a Vent-peg at the Top of the Vessel in warm Weather, open it, and if your Drink histes, as it often will, loofen it till it has done, then step it close again. If you can boil your Ale in one boiling it is best, if your Copper will allow of it; if not, boil it as Conveniency ferves. The Strength of your Beer must be according to the Male you allow more or less, there is no certain Rule. W ben

When you come to draw your Beer, and find it is not fine, draw off a Gallon, and fet it on the Fire, with two Ounces of Ifinglate but finall and beat. Diffolve it in the Beer over the Fire; when it is all melted, let it ffand till it is cold, and pour it in at the Bung, which must lay loose on till it has done fomenting, then stop it close for a Month.

Take great Care your Casks are not mufty, or have any ill Taffe; if they have, it is the hardest Thing in the World to

fweeten them.

You are to wash your Cask with cold Water before you scald them, and they should lye a Day or two foaking, and clean them well, then scald them.

# The best Thing for Rope Beer.

MIX two Handfuls of Bean Flour, and one Handful of Salt, throw this into a Kilderkin of Beer, don't stop it close till it has done fomenting, then let it stand a Month, and draw it off; but sometimes nothing will do with it.

# When a Barrel of Beer is turn'd four.

TO a Kilderkin of Beer throw in at the Bung a Quart of Oatmeal, lay the Bung on loose two or three Days, then stop it down close, and let it stand a Month. Some throw in a Piece of Chalk as big as a Turkey's Egg, and when it has done working stop it close for a Month, then tap it.

# To make White Bread after the London-Way.

Y OU must take a Bushel of the finest Flour well dressed, put it in the Kneading-trough at one End ready to mix, take a Gallon of Water (which we call Liquor) and tome Yeast; shir it into the Liquor till it looks of a good brown Colour and begink to curdle, strain-it-and mix it with your Flour, till it is about the Thickness of a good Seed Cake; then cover it up with the Lid of the Frough, and let it stand three Hours, and as soon as you see it begin to sall take a Gallon more of Liquor, and weigh three Quarters of a Pound of Salt, and with your Hand mix it well with the Water; strain it, and with this Liquor make your Dough of a moderate Thickness sit to make up into Loaves; then cover it again with the Lid; and let it stand three Hours more: In the mean Time put the Wood into the Oven and heat it, it will take two Hours heating. When your Spunge has stood its proper Time alear the Oven, and begin to make your Bread. Set it in the

Oven and close it up, and three Hours will just bake it. When once it is in you must not open the Oven till the Bread is baked; and observe in Summer that your Water be Milk warm, and in

Winter as hor as you can bare your Finger in it.

Note, As to the exact Quantity of Liquor your Dough will take. Experience will teach you in two or three Times making, for all Flour does not want the same Quantity of Liquor; and if you make any Quantity, it will raise up the Lid and run over, when it has stood its Time.

# To make French Bread.

TAKE three Quarts of Water and one of Milk, in Winter scalding hot, in Summer a little more than Milk warm; ieafon it well with Salt, then take a Pint and a Half of good Ale Yeast not bitter, lay it in a Gallon of Water the Night before, pour it off the Water, stir in your Yeast into the Milk and Water, then with your Hand break in a little more than a Quarter of a Pound of Butter, work it well till it is dissolved, then beat up two Eggs in a Bason, and stir them in, have about a Peck and a Half of Flour, mix it with your Liquor; in Winter make your Dough pretty stiff, in Summer more flack; so that you may use a little more or less of Flour, according to the Stiffness of your Dough; mix it well, but the less you work it the better, make it into Rolls, and have a very quick Oven, but not to burn. When they have lain about a Quarter of an Hour turn them on the other Side, let them lye about a Quarter longer, take them out and chip all your French Bread with a Knife, which is better than raiping it, and makes it look spungy and of a fine yellow, whereas the rasping takes off all that fine Colour, and makes it look too smooth. You must stir your Liquor into the Flour as you do for Pye Crust. After your Dough is made cover it with a Cloth, and let it lye to rife while the Oven is heating.

# To make Muffins and Oat-Cakes.

To a Bushel of Hersfordhire white Flour, take a Pint and a Half of good Ale Yeast, from pale Male, if you can get it, because it is whitest; let the Yeast lye in Water all Night, she next Day pour off the Water clear, make two Gallons of Water just Milk warm, not to scald your Yeast, and two Ounces of Sah; mix your Water, Yeast and Salt well together for about a Quarter of an Hour, then strain it, and mix up your Dough as light as possible, and let it lye in your Trough an Hour to tife, then with your Hand roll it, and pull it into little Pieces about as large

large Walliur, roll them with your Hand like a Ball, lay them on your Fable, and as fast as you do them lay a Piece of Flannel over them, and be fire to keep your Dough covered with Flannel; when you have rolled out all your Dough begin to bake the first, and by that Time they will be spread out in the right Form; lay them on your Iron, as one Side begins to change Colour turn the other, and take great Care they don't burn, or be too much discoloured, but that you will be a judge of in two or three Makings. Take care the Middle of the Iron is not too hot, as it will be, but then you may put a Brickbat or two in the Middle of the Fire to stacken the Heat. The Thing you bake on must be made thus:

Build a Place juit as if you was going to fet a Copper; and in the Stead of a Copper a Piece of Iron all over the Top fixed in Form just the same as the Bottom of an Iron Pot; and make your Fire underneath with Coal as in a Copper. Observe, Mustins are made the same Way; only this, when you pull them to Pieces roll them in a good deal of Flour, and with a Rolling-pin roll them thin, cover them with a Piece of Flannel, and they will rite to a proper Thickness; and if, you find them too big of too little, you must roll Dough accordingly. These must not be the least discopiour d.

When you eat them toast them with a Fork crift on both Sides, then with your Hand pull them open, and they will be like a Honeycomb; lay in as much Butter as you intend to use, then clap them together again, and fet it by the Fire. When you think the Butter is melted turn them, that both Sides may be butter'd alike; but don't touch them with a Knife, either to ipread or cut them open, if you do they will be as heavy as Lead, only when they are quite butter'd and done, you may cut them crofs with a Knife.

Note. Some Flour will toak up a Quart or three Pints more Water, then other Flour, then you must add more Water, or shake in more Flour in the making up, for the Dough must be as light as possible.

A Receipt for making Bread without Barm, by the Help of a Leaven.

making, which has been raised by Barm, keep it by your last making, which has been raised by Barm, keep it by your last wooden Vessel, and cover it well with Flour. This is your Leaven; then the Night before you intend to bake put the laid Leaven to a Peck of Flour, and work them well together with warm Water. Let it lye in a dry wooden Vessel, well covered with a Linnen Cloth and a Blanket, and keep it in a warm Place. This

Dough kept warm will rife against next Morning, and will be sufficient to mix with two or three Bushels of Flour, being work'd up with warm Water and a little Sale. When it is well worked up, and thoroughly mixed with all the Flour, let it be well covered with the Linnen and Blanket, until you find it rise; then knead it well, and work it up into Bricks or Loaves, making the Loaves broad, and not so thick and high as is frequently done, by which Means the Bread will be better baked. Then bake your Bread.

Always keep by you two or more Pounds of the Dough of your last Baking, well covered with Flour to make Leaven to terve from one baking Day to another; the more Leaven is put to the Flour the lighter and spungier the Bread will be; the fresher the Leaven, the Bread will be less sour.

A Method to preserve a large Stock of Teast, which will keep and he of Use for several Months, either to make Bread or Cakes.

WHEN you have Yeast in Plenty, take a Quantity of it, thir and work it well with a Whisk untill it becomes liquid and thin, then get a large wooden Platter, Cooler or Tub, clean and dry, and with a fost Brush lay a thin Layer of the Yeast on the Tub, and turn the Mouth downwards that no Dust may fall upon it, but so that the Air may get under to dry it. When that Coat is very dry, then lay on another Coat, and let it dry, and so go on to put one Coat upon another till you have a lufficient Quantity. even two or three Inches thick, to serve for several Months, always taking Care the Yeast in the Tub be very dry before you lay more on. When you have occasion to make Use of this Yeast cut a Piece off, and lay it in warm Water; stir it together, and it will be fit for Use. If it is for Brewing, take a large Handful of Birch tied together, and dip it into the Yeast and hang it up to dry; take great Care no Dust comes to it; and so you may do as many as you please. When your Beer is fit to set to work throw in one of these, and it will make it work as well as if you had fresh Yeast. You must whip it about in the Wort, and then let it lye; when the Fat works well, take out the Broom and dry it again, it will do for the next Brewing.

Note, In the building your Oven for Baking, observe that you make it round, low roofed, and a little Mouth; then it will take less Fire, and keep in the Heat better than a long Oven and high

reofed, and will bake the Bread better.

Let them stand till they are soft enough, to rub them through a coarse Hair-sleve, as the Pulp comes take it off the Seve; they are a dry Berry, and will require Pains to rub them through; then add its Weight, in Sugar, mix them well together without boiling; keep it in deep Gallipots for Use.

# To make Syrup of Roses.

INFUSE three Pounds of Damask Rose-leaves in a Gallon of warm Water, in a well glazed earthen Pot, with a narrow Mouth, for eight Hours, which stop so close, that none of the Virtue may exhale. If the putting in the Juices of the Quinces should check the boiling of the Sugar too much, give the Syrup some boiling, till it becomes pearled; then take it off the Fire, and when it is cold, put it into the Bottles.

sdr do fin d de Tompreserve Apricots.

ARE your Apricots, stone and pare them thin, and take their Weight in double refined Sugar beaten and sifted, put your Apricots in a Silver Cup or Tankard, cover them over with Sugar, and let them stand so all Night. The next Day put them in a Preserving pan, set them on a gentle Fire, and let them simmer a little while, them let them boil till tender and clear, taking them off sometimes to turn and skim. Keep them under the Liquor as they are doing, and with a small clean Bodkin or great Needle, jobb them sometimes, that the Syrup may penetrate into them. When they are enough, take them up, and put them in Glasses. Boil and skim your Syrup; and when it is cold, put it on your Apricots.

When they are boiled and the Liquor pretty strong, strain it out: Add for every Pound of the whole Danisons wiped clean a Pound of single refined Sugar, put the third Part of your Sugar into the Liquor, set it over the Fire, and when it simmers put

put in the Damson. Let them have one good boil, and take them off for Half an Hour, covered up clote; then fet them on again, and let them summer over the Fire, after turning them; then take them out and put them in a Bason, strew all the Sugar that was lest on them, and pour the hot Liquor over them; cover them up, and let them stand till next Day, then boil them up again till they are enough: Take them up, and put them in Port; boil the Liquor till it jellies, and pour it on them when it is almost cold, so paper them up.

# To candy any Sort of Flowers.

AKE the best treble-refined Sugar, break it into Lumps, and dip it Piece by Piece in Water; put them into a Vessel of Silver, and melt them over the Fire; when it just boils, strain is, and set it on the Fire again, and let it boil till it draws in Hairs, which you may perceive by holding up your Spoon, then put in the Flowers, and set them in Cups or Glasses; when it is of a hard Candy, break it in Lumps, and lay it as high as you please. Dry it in a Stow, or in the Sun, and it will look like Sugar-candy.

# To preserve Gooseberries whole without stoning.

TAKE the largest preserving Gooseberries, and pick off the black Eye, but not the Stalk, then set them over the Fire in a Pot, of Water to scald, cover them very close to scald, but not boil or break, and when they are tender take them up into cold Water, then take a Pound and a Half of double refin'd Sugar to a Pound of Gooleberries, and clarify the Sugar with Water; a Pint to a Pound of Sugar; and when your Syrup is cold put the Gooleberries fingle in your Preserving-pan, put the Syrup to them; and fet them on a gentle Fire; let them boil, but not too fast, lest they break, and when they have boiled and you perceive the Sugar has entered them, take them off, cover them with white Paper, and fet them by till the next Day, Then take them out of the Syrup. and boil the Syrup till it begins to be ropy; skim it, and put it to them again, then let them on a gentle Fire, and let them preferve gently till you perceive the Syrup will rape; then take them off, let them by till they are cold, cover them with Paper, then boil some Gooleberries in fair Water, and when the Liquor is strong enough strain it out. Let it stand to lettle, and to every Pint take a Pound of double-refined Sugar, then make a Telly of it, put the Goofeberries in Glasses, when they are cold, cover them with the Jelly the next Day, paper them wer, and then Half dry the Paper that goes in the Infide. It closes down berter, and then white Paper over the Glass. Set it in your Stove of a dry Place.

To preserve White Wallnuts.

LIRST pare your Wallnuts till the White appears and nothing elle. You must be very careful in the doing them that they don't turn black, and as fast you do them, throw them into Salt and Water, and let them lye till your Sugar is ready. Take three Pounds of good Loaf Sugar, put it into your Preserving-pan, set it over a Charcoal Fire, and put as much Water as will just wet the Sugar. Let it boil, then have ready ten or a dozen Whites of Eggs strained and beat up to a Froth, cover your Sugar with the Froth as it boils, and skim it; then boil it, and skim it till it is as clear as Chrystal, then throw in your Wallnuts, just give them a boil till they are tender, then take them out, and lay them in a Dish to cool; when cool, put them into your Preserving-pan, and when the Sugar is as warm as Milk pour it over them; when quite cold paper them down.

Thus clear your Sugar for all Preserves, Apricots, Peaches,

Gooleberries, Currents, &c.

To preserve Wallnuts green.

WIPE them very clean, and lay them in strong Salt and Water twenty-four Hours; then take them out and wipe them very clean, have ready a Skillet of Water boiling, throw them in, let them boil a Minute, and take them out: Lay them on a coarse Cloth, and boil your Sugar as above; then just give your Wallnuts a scald in the Sugar, take them up and lay them to cool. Put them in your Preserving-pot, and pour on your Syrup as above.

A nice Way to preserve Peaches.

DUT your Peaches in boiling Water, just give them a Scald, but don't let them boil, take them out and put them in cold Water, then dry them in a Sieve, and put them in long wide Mouth Bottles: To Half a Dozen Peaches take a Quarter of a Pound of Sugar, clarify it, pour it over your Peaches, and fill the Bottles with Brandy. Stop them close, and keep them in a close Place.

To make Quince Cakes.

OU must let a Pint of the Syrup of Quinces, with a Quart or two of Rasberries be boiled and clarified over a clear gentle Fire, taking Gare that it be well skimmed from Time to Time: Then add a Pound and Half of Sugar, cause as much k r

more to be brought to a Candy-height, and pour'd in hot. Let the Whole be continually stirred about till it is almost cold, then spread it on Plates, and cut it out to Cakes.

#### C H A P. XIX.

To make Anchovies, Vermicella, Catchup, Vinegar, and to keep Artichokes, French Beans, &c.

#### To make Anchovies.

T O a Peck of Sprats, two Pounds of common Salt, a Quarter of a Pound of Bay-falt, four Pounds of Salt-petre, two Ounces of Sal Prunella, Two-pennyworth of Cochineal, pound all in a Mortar, put them into a Stone-pot, a Row of Sprats, a Layer of your Compound, and so on to the Top alremately. Press them hard down, cover them close, let them stand six Months, and they will be sit for Use. Observe that your Sprats be very fresh, and don't wash nor wipe them, but just take them as they come out of the Water.

To pickle Smelts, where you have Plenty.

TAKE a Quarter of a Peck of Smelts, Half an Ounce of Pepper, Half an Ounce of Nutmeg, a Quarter of an Ounce of Mace, Half an Ounce of Petre-falt, a Quarter of a Pound of common Salt, beat all very fine, wash and clean the Smelts, gut them, then lay them in Rows in a Jar, and between every Layer of Smelts, strew the Seasoning with four or five Bay-leaves, then boil Red Wine, and pour over them enough to cover them. Cover them with a Plate, and when cold, tye them down close. They exceed Anchovies.

#### To make Vermicella.

MIX Yolks of Eggs and Flour together into a pretty stiff Paste, so as you can work it up cleverly, then roll it as thin as it is possible to roll the Paste. Let it dry in the Sun, when it is quite dry, with a very sharp Knife cut it as thin as possible, and keep it in a dry Place. It will run up like little Worms, as Vermicella does; though the best Way is to run it through a coarse Sieve, whilst the Paste is soft. If you want some to be made in haste, dry it by the Fire, and cut it small. It will dry by the Fire in a Quarter of an Hour. This sar exceeds what comes from Abroad, being fresher.

To

To make Catchup.

A KE the large Flaps of Mushrooms, pick nothing but the Straws and Dirt from it, then lay them in a broad earthen Pan, strow a good deal of Salt over them, let them lye till next & Morning, then with your Hand brake them, put them into a Stewpan, let them boil a Minute or two, then strain them through a coarfe Cloth, and wring it hard. To take out all the Juice, let it stand to settle, then pour it off clear, run it through a thick Flannel Bag, (some filtre it through brown Paper, but that is a very tedious Way) then boil it, to a Quart of the Liquor put a Quarter of an Ounce of whole Ginger, and Half a Quarter of an Ounce of whole Pepper. Boil it briskly a Quarter of an Hour, then strain it, and when it is cold, put it into Pint Bottles, each Bottle put four or five Blades of Mace, and fix Cloves, cork it tight, and it will keep two Years. This gives the best Flavour of the Mulhrooms to any Sauce. If you put to a Pint of this Catchup, a Pint of Mum, it will taste like foreign Catchup.

Another Way to make Catchup.

A K E the large Flaps and falt them as above; boil the Liquor, strain it through a thick Flannel Bag: To a Quart of that Liquor put a Quart of Stale Beer, a large Stick of Horseradish cut in little Slips, sive or six Bay-leaves, an Onion stuck with twenty or thirty Cloves, a Quarter of an Ounce of Mace, a Quarter of an Ounce of Nutmegs beat, a Quarter of an Ounce of Black and White Pepper, a Quarter of an Ounce of All-Spice, and sour or sive Races of Ginger. Cover it close, and let it simmer very softly till about one Third is wasted; then strain it through a Flannel Bag, when it is cold bottle it in Pint Bottles, cork it close, and it will keep a great while. You may put Red Wine in the Room of Beer; some put in a Head of Garlick, but I think that spoils it. The other Receipt you have in the Chapter for the Sea.

# Artichokes to keep all the Year.

BOIL as many Artichokes as you intend to keep; hoil them to as just the Leaves will come out, then pull off all the Leaves and Choke, cut them from the Strings, lay them on a Tin Plate, and put them in an Oven where Tarts are drawn; let them stand rill the Oven is heated again, take them out before the Wood is put in, and set them in again after the Tarts are drawn; to do till they are as dry as a Board, then put them in a Paper Bag, and hang them in a dry Place; when you use them lay them in warm Water

Water three or four Hours before you use them, shifting the Water often. Let the last Water be boiling hot; they will be very tender, and eat as fine as fresh ones. You need not dry all your Bottoms at once, as the Leaves are good to eat; so boil a Dozen at a Time, and save the Bottoms for this Use.

### To keep French Beans all the Year.

AKE fine young Beans, gather them of a very fine Day, have a large Stone Jar ready clean and dry, lay a Layer of Salt at the Bottom, and then a Layer of Beans, then Salt, and then Beans, and so on till the Jar is full; cover them with Salt, tye a coarle Cloth over them, and a Board on that, and then a Weight to keep it close from all Air; set them in a dry Cellar, and when you use them take some out and cover them close again; wash them you took out very clean, and let them lye in lost Water twenty four Hours, shifting the Water often; when you boil them, don't put any Salt in the Water. The best Way of dressing them is, boil them with just the white Heart of a small Cabbage, then drain them, chop the Cabbage, and put both into a Sauce-pan, with a Piece of Butter as big as an Egg roll'd in Flour; shake a little Pepper, put in a Quarter of a Pint of good Gravy, let them stew ten Minutes, and then dish them up for a Side Dish. A Pint of Beans to the Cabbage. You may do more or lets, just as you please.

# To keep Green Peas till Chrifimas.

A K E fine young Peas, shell them, throw them into boiling Water with some Salt in, let them boil five or fix Minutes, throw them into a Cullender to drain, then lay a Cloth four or five times double on a Table, and spread them on; dry them very well, and have your Bottles ready, fill them and cover them with Mutton Fat try'd; when it is a little cool fill the Necks almost to the Top, cork them, tye a Bladder and a Lath over them, and fet them in a cool dry Place. When you use them boil your Water, put in a little Salt, some Sugar, and a Piece of Butter; when they are boiled enough, throw them into a Sieve to drain, then put them into a Sauce-pan with a good Piece of Butter, keep shaking it round all the Time till the Butter is melted, then turn them into a Dish, and send them to Table.

# To keep Green Gooseberries till Christmas.

PICK your large green Gooteberries on a dry Day, have ready your Bottles clean and dry, fill the Bottles and cork them, fet them in a Kettle of Water up to their Neck, let the Water boil very toftly till you find the Goofeberries are coddled, take them

our, and put in the rest of the Bottles till all are done; then have ready some Rosin melted in a Pipkin, dip the Necks of the Bottles in, and that will keep all Air from coming at the Cork, keep them in a cool dry Place, where no Damp is, and they will bake as red as a Cherry. You may keep them without scalding, but then the Skins will not be so tender, nor bake so fine.

### To keep Red Gooseberries.

PICK them when full ripe, to each Quart of Goofeberries, put a Quarter of a Pound of Liston Sugar, and to each Quarter of a Pound of Sugar put a Quarter of a Pint of Water, let it boil, then put in your Goofeberries and let them boil foftly two or three Minutes, then pour them into little Stone Jars, when cold cover them up, and keep them for Use; they make fine Pyes with little Trouble. You may press them through a Cullender, to a Quart of Pulp put Half a Pound of fine Liston Sugar, keep stirring over the Fire till both be well mix'd and boil'd, then pour it into a Stone Jarr, when cold cover it with white Paper, and it makes very pretty Tarts or Puss.

# To keep Wallnuts all the Year.

TAKE a large Jar, a Layer of Sea-fand at the Bottom, then a Layer of Wallnuts, then Sand, then the Nuts, and so on till the Jar is sull; and be sure they don't touch each other in any of the Layers. When you would use them, lay them in warm Water for an Hour, shifting the Water as it cools; then rub them dry, and they will peel well, and eat sweet. Lemon will keep thus covered better than any other way.

# Another Way to keep Lemons.

í.

TAKE the fine large Fruit that are quite found and good, and take a fine Packthread about a Quarter of a Yard long, run it through the hard Nib at the End of the Lemon, then tye the String together, and hang it on a little Hook, in a dry airy Place; fo do as many as you please; but be sure they don't touch one another, nor any thing else, but hang as high as you can. Thus you may keep Pears, &c. only tying the String to the Stalk.

To keep White Bullice, or Pear-Plumbs, or Damfons, &c. for Tarts, or Pies.

GATHER them when full grown, and just as they begin to turn. Pick all the largest out, save about two Thirds of the Fruit, the other Third put as much Water to as you think will cover the rest. Let them boil, and skim them; when the Fruit is boiled

boiled very foft, then strain it through a coarse Hair-sieve; and to every Quart of this Liquor, put a Pound and Half of Sugar, boil it, and skim it very well; then throw in your Fruit, just give them a scald, take them off the Fire, and when cold, put them into Bottles with wide Mouths, pour your Syrup over them, lay a Piece of white Paper over them, and cover them with Oil. Be sure to take the Oil well off when you use them, and don't put them in larger Bottles than you think you shall make use of at a Time, because all these Sorts of Fruits spoil with the Air.

# To make Vinegar.

T O every Gallon of Water, put a Pound of coarle Lisbon Sugar, let it boil, and keep skimming of it, as long as the Scum rifes; then pour it into Tubs, and when it is as cold as Beer to work, toast a good Toast, and rub it over with Yeast. Let it work twenty-four Hours; then have ready a Vessel Iron-hooped. well painted, fixed in a Place where the Sun has full Power, and fix it so as not to have any Occasion to move it. When you draw it off, then fill your Vessel, lay a Tile on the Bung to keep the Dust out. Make it in March, and it will be fit to use in June or July. Draw it off into little Stone Bottles the latter End of June or Beginning of July, let it stand till you want to use, and it will never foul any more. But when you go to draw it off, and you find it is not four enough, let it stand a Month longer before you draw it off. For Pickles to go abroad, use this Vinegar alone; but in England, you will be obliged, when you pickle, to put one Half cold Spring-water to it, and then it will be full four with this Vinegar. You need not boil, unless you please, for almost any Sort of Pickles, it will keep them quite good. It will keep Wallnuts very fine without boiling, even to go to the Indies; but then don't put Water to it. For green Pickles, you may pour it scalding hot on two or three Times. All other Sorts of Pickles you need not boil it. Mushrooms only wash them clean, dry them. put them into little Bottles, with a Nutmeg just scalded in Vinegar, and fliced (whilst it is hot) very thin, and a few Blades of Mace; then fill up the Bottle with the cold Vinegar and Springwater, pour Mutton Fat try'd over it, and tye a Bladder and Leather over the Top. These Mush coms won't be so white, but as finely taffed, as if they were just gathered; and a Spoonful of this Pickle will give Sauce a very fine Flavour.

White Wallnuts, Suckers and Onions, and all white Pickles do

in the same Manner, after they are ready for the Pickle.

To

# To fry Smelts.

AY your Smelts in a Marinade of Vinegar, Salt, Pepper, and Bay-leaves, and Clives for a few Hours; then dry them in a Napkin, drudge them well with Flour, and have ready fome Butter hot in a Stew-pan. Fry them quick, lay them into your Dish, and garnish with fry'd Parsley.

# To rouft a Pound of Butter.

LAY it in Salt and Water two or three Hours, then spit it, and rub it all over with Crumbs of Bread, with a little grated Nutmeg, lay it to the Fire, and as it roasts, baste it with the Yolks of two Eggs, and then with Crumbs of Bread all the Time it is a roasting; but have ready a Pint of Oysters stewed in their own Liquor, and lay in the Dish under the Butter, when the Bread has soak'd up all the Butter brown the Outside, and lay it on your Oysters. Your Fire must be very slow.

### To raise a Sallad in two Hours at the Fire.

AKE fresh Horse Dung hot, lay it in a Tub near the Fire, then sprinkle some Mustard Seeds thick on it, lay a thin Lay of Horse Dung over it, cover it close and keep it by the Fire, and it will rise high enough to cut in two Hours.

#### CHAP. XX.

# DISTILLING.

### To diftil Wallnut Water.

TAKE a Peck of fine green Wallnuts, bruise them well in a large Mortar, put them in a Pan, with a Handful of Balm bruised, put two Quarts of good French Brandy to them, cover them close, and let them lye three Days; the next Day distil them in a cold Still, from this Quantity draw three Quarts, which you may do in a Day.

#### How to use this ordinary Still.

Y OU must lay the Plate, then Wood Ashes thick at the Bottom, then the Iron-pan, which you are to fill with your Wallnuts and Liquor, then put on the Head of the Still, make a pretty brisk Fire till the Still begins to drop, then slacken it so as just to have enough to keep the Still at Work, mind all the Time to keep

keep a wet Cloth all over the Head of the Still all the Time it is at Work, and always observe, not to let the Still work longer than the Liquor is good, and take great Care you don't burn the Still; and thus you may distil what you please. You may draw off nine Pints of Water, and sweeten it to your Taste. Mix all together, and bottle it up.

# To distil red Rose-Buds.

E T your Roses in fair Water; four Gallons of Roses will take near two Gallons of Water, then still them in a cold Still; take the same stilled Water, and put it into as many fresh Roses as it will wet, then still them again.

The first, second, and third Running is good, and some of the fourth.

Y OU must take Scurvy-grass, Brook-lime, Watercreffes, Roman Wormwood, Rue, Mint, Balan, Sage, Clivers, of each one Handful; green Mesery two Handfuls; Poppys if fresh Half a Peck, if dry a Quarter of a Peck; Cochineal Six Rennywords, Saffron

You may make this Water at any Time of the Year, if you live at London, because the Ingredients are always to be had, either

green or dry; but it is best sade in Summer. .

This is good in Fevers sweetened with Sugar or Syrup of Cloves.

How to distil Vinegar, you have in the Chapter of Pickles. To

## C H A P. XXI.

How to market; and the Seasons of the Year for Butcher's Meat, Poultry, Fish, Herbs, Roots, &c, and Fruit.

The Hind Quarter is the Leg, which contains the Knuckle and Fillet, then the Loin.

#### House I amb.

The Hind Quarter, only Leg and Loin.

A Bacon

# A Bacon Hog.

THIS is cut different, because of making Ham, Bacon, and pickled Pork. Here you have fine Sparribe, Chines, and Griskins, and Fat for Hog's-lard. The Liver and Crow is much admired try'd with Bacon; the Feet and Ears of both are equally good soused.

Pork comes in Season at Bartholomew-Tide, and holds good

till Lady-Day.

# How to chuse Butcher's Meat.

To chuse Lamb.

IN a Fore Quarter of Lamb, mind the Neck Vein; if it be an azure Blue it is new and good, but if greenish or yellowish, it is near tainting, if not tainted already. In the Hinder Quarter, smell under the Kidney, and try the Knuckle; if you meet with a faint Scent, and the Knuckle be limber, it is stale killed. For a Lamb's Head, mind the Eyes if they be sunk or wrinkled, it is stale; if plump and lively, it is new and sweet.

Veal.

If the bloody Vein in the Shoulder looks blue, or a fright red, it is new killed; but if blackifh, greenish, or yellowish, it is flabby and stale; if wrapped in wet Cloaths, smell whether it be musty or not. The Loin first taints under the Kidney, and the Flesh, if stale killed, will be soft and slimy.

The Breast and Neck taints first at the upper End, and you will perceive some dusky, yellowish, or greenish Appearance; the Sweetbread on the Breast will be clammy; otherwise its such and good. The Leg is known to be new by the Stiffness of the Joint; if limber, and the Flesh seems clammy, and has green or yellow Specks, 'tis stale. The Head is known as the Lamb's. The Flesh of a Bull Calf is more red and sirm than that of a Cow Calf, and the Fat more hard and curdled.

Mutton.

If Mutton be young, the Flesh will pinch tender; if old, it will wrinkle and remain so; if young, the Fat will easily part from the Lean; if old, it will stick by Strings and Skins: If Ram-Mutton, the Fat seels spungy, the Flesh close grained and tough, not rising again, when dented by your Finger: If Ewe-Mutton, the Flesh is paler than Weather-Mutton, a closer Grain, and easily parting. If there be a Rot, the Flesh will be palish, and the Fat a faint whitish, inclining to yellow, and the Flesh be loose at the Bone. If you squeeze it hard,

hard, fome Drops of Water will stand up like Sweat; as to Newness and Staleness, the same is to be observed as by Lamb.

Beef.

If it be right Ox-Beef, it will have an open Grain, if young, a tender and only Smoothness: If rough and spungy, it is old, or inclining to be so, except Neck, Brisquit, and such Parts as are very sibrous; which in young Meat will be more tough than in other Parts. A Carnation pleasant Colour betokens good spending Meat, the Sewet a curious white, yellowish is not so good.

Cow-Beef is less bound and closer grained than the Ox, the Fat whiter, but the Lean somewhat paler, if young, the Dent you make with your Finger will rise again in a little

Time.

Bull-Beef is of a closer Grain, a deep dusky red, tough in pinching, the Fat skinny, hard, and has a rammish rank Smell; and for Newness or Staleness, this Flesh bought fresh, has but few Signs, the most material is its Clamminess, and the rest your Smell will inform you. If it be bruised, these Places will look more dusky or blackish than the rest.

Pork.

If it be young, the Lean will break in pinching between your Fingers, and if you nip the Skin with your Nails, it will make a Dent; also if the Fat be fost and pulpy, in a manner like Lard: If the Lean be tough, and the Fat slabby and spungs, seeling rough, it is old, especially if the Rind be stubborn, and you cannot nip it with your Nails.

If of a Boar, though young, or of a Hog, gelded at full Growth, the Flesh will be hard, tough, reddish, and rammish of Smell; the Fat skinny and hard; the Skin very thick and

tough, and pinched up it will immediately fall again.

As for old or new killed, try the Legs, Hands; and Springs, by putting your Fingers under the Bone that comes out; for if it be tainted, you will there find it by fmelling your Finger; befides, the Skin will be sweaty and clammy when state, but cool and smooth when new.

If you find little Kernels in the Fat of Pork, like Hail-

that; if many, 'tis meally, and dangerous to be eaten.

How to chuse Brawn, Venison, Westphalia Hams, & c. BRAWN is known to be old or young by the extraordinary or moderate Thickness of the Rind; the thick is old, the moderate

moderate is young. If the Rind and Fat be very tender, it is not Boar Brawn, bur Barrow or Sow.

Venison.

Try the Haunches or Shoulders under the Bones that come out; with your Finger or Knife, and as the Scent is sweet or rank, it is new or stale; and the like of the Sides in the most fleshy Parrs. If tainted, they will look greenish in some Places, or more than ordinary black. Look on the Hoofs, and if the Clists are very wide and tough, it is old; if close and smooth, it is young. The Season for Venison.

The Buck Venison begins in May, and is in high Season till All-Hallows-Day; the Doe is in Season from Michaelmas to the

End of December, or sometimes to the End of January.

Westphalia Hains and English Bacon.

Put a Knife under the Bone that sticks out of the Ham, and if it comes out in a Manner clean, and has a curious Flavour, it is sweet and good; if much smeered and dulled, it is tainted or rusty.

English Gammons are tried the same Way; and for other Parts try the Fat, if it be white, oily in feeling, and does not break or crumble, and the Flesh sticks well to the Bone, and bears a good Colour, it is good; but if the contrary, and the Lean has some little Streaks of yellow, it is rusty, or will soon be so.

Butter, Cheese and Eggs.

When you buy Butter, trust not to that which will be given your to taste, but try in the Middle, and if your Smell and Taste be

good, you cannot be deceived.

Cheefe is to be chosen by its moist and smooth Coat; if old Cheefe be rough coated, rugged, or dry at Top, beware of little. Worms or Mites. If it be over full of Holes, moist or spungy, it is subject to Maggots. If any soft or perished Place appear on the Outside, try how deep it goes, for the greater Part may be hid within.

Eggs, hold the great End to your Tongne; if it feels warm, be fure it is new; if cold, it is bad, and so in Proportion to the Heat and Cold, so is the Goodness of the Egg. Another Way to know a good Egg, is to put the Egg into a Pan of cold Water, the fresher the Egg the sooner it will fall to the Bottom; if rotten, it will swim at the Top. This is also a sure Way not to be deceived. As to the keeping of them, pitch them all with the small End downwards in sine Wood-Ashes, and they will keep some Months.

# How to chase Poultry.

To know whether a Capon is a true one, young or old, new or stale.

IF he be young his Spurs are thort, and his Legs smooth; if a true Capon, a fat Vein on the Side of his Breast, the Comb pale, and a thick Belly and Rump: If new he will have a close hard Vent; if stale, a loose open Vent.

A Cock or Hen-Turkey, Turkey-Poults.

If the Cock be young, his Legs will be black and smooth, and his Spurs short; if stale, his Eyes will be sunk in his Head, and the Feet dry; if new, the Eyes lively and Feet limber. Observe the like by the Hen, and moreover it she be with Egg, she will have a soft open Vent, if not, a hard close Vent. Turkey-Poults are known the same Way, and their Age cannot deceive you.

A Cock, Hen, &c.

If young his Spurs are short and dubbed, but take particular Notice they are not pared or scraped: If old, he will have an open Vent, but if new a close hard Vent; and so of a Hen for Newness or Staleness; if old, her Legs and Comb are rough; if

young, Imooth.

A Tame Goofe, Wild Goofe, Bran Goofe.

If the Bill be yellowish, and she has but few Hairs, she is young, but if full of Hairs, and the Bill and Foot red, she is old; if new, limber footed; if stale, dry footed; and so of a Wild Goose, and Bran Goofe.

Will:

Wild and Tame Ducks.

The Duck, when far, is hard and thick on the Belly, but if not, thin and lean; if new, limber footed; if stale, dry footed. A true Wild Duck has a reddish Foot, smaller than the Tame one.

Goodwets; Marle, Knots, Ruffs, Gull, Dotterels, and Wheat'

If these be old, their Legs will be rough; if young, smooth; if sa, a far Rump; if new, limber footed; if stale, dry footed.

Pheafant, Cock and Hen.

The Cock, when young, has dubbed Spurs; when old, ffiarp fmall Spurs; if new, a fast Vent, and if state; an open flabby one. The Hen if young, has smooth Legs, and her Flesh of a curious Grain; if with Egg, she will have a soft open Vent, and if not, a close one. For Newness or Stateness as the Cock.

Heath and Pheasant Poults.

If new, they will be stiff and white in the Vent, and the Feet. limber; if fat, they will have a hard Vent; if stale, dry sooted to

and limber, and if touched they will peel.

Hearb-Cook and Hen.

If young, they have imouth Legs and Bills; and if old, rough,
For the rest are known as the foregoing.

Partridge, Cock or Hen. A.

The Bill white and the Legs bluish, shew Age; for if young, the Bill is black and Legs yellowish; if new, a fast Vent; if stale, a green and open one. If their Crops be full, and they have; fed on green Wheat, they may taint there; and for this smell in their Mouth,

Woodcock and Snipe.

The Woodcock, if fat, is thick and hard; if new, limber footed; when stale, dry footed; or if their Noses are snorty, and their Throats muddy and moorish, they are nought. A Snipe, if fat, has a fat Vein in the Side under the Wing, and in the Vent feels, thick; for the rest like the Woodcock.

Doves and Pigeons.

To know the Turtle-Dove, look for a bluish Ring round his Neck, and the rest mostly white; the Stock-Dove is bigger, and the Ring-Dove is less than the Stock-Dove. The Dovehouse Pigeons, when old, are red legged; if new and sat, they will seekfull and sat in the Vent, and are limber footed; but if stale, a slabby and green Vent.

And thus of green or grey Plover, Felfare, Blackbird, Thrush,

Larks, &c.

Of Hare, Leveret, and Rubbit.

Hare will be whitish and stiff, if new and clean killed; it stale, the Flesh blackish in most Parts, and the Body limber; if the Clest in her Lips spread very much, and her Claws wide and ragged, she is old, and the contrary young. If the Hare be young, the Ears will tare like a Piece of brown Paper; if old, dry and tust. To know a true Leverer, seel on the fore Leg near the Foot, and if there be a small Bone or Knob it is right, if not, it is a Hare; for the rest observe as in the Hare. A Rabbit if stale, will be limber and slimy; if new, white and stiff; if old, her Claws are very long and rough, the Wool mottled with grey Hairs; if young, the Claws and Wool smooth.
