Preface

The fifteenth edition of *Library of Congress Subject Headings (LCSH 15)* contains subject headings created by catalogers and used in cataloging at the Library of Congress since 1898.

This edition contains headings established through December 1991. Responsibility for the maintenance of the data base is held by the staff of the Subject Headings Editorial Section under the direction of the editor, Ronald A. Goudreau. Barbara Barnes, Bonnie Briscoe, Laurence Smelser, Claudia Coleman and Elizabeth Rinn edited headings in the data base.

The Cataloging Distribution Service (CDS) produced *LCSH* from records in the USMARC subject authorities format. CDS generated authority and reference entries from the MARC records, sorted the entries, and formatted the data into page images. The resulting magnetic tape of photocomposed data was used to drive a typesetting device.

Our appreciation is extended to the staff of the Subject Cataloging Division and the Cataloging Distribution Service for making this fifteenth edition possible.

Mary K. D. Pietris

LIBRARY OF CONGRESS SUBJECT HEADINGS	1

Introduction

The fifteenth edition of *Library of Congress Subject Headings (LCSH 15)* contains headings established by the Library through December 1991. The headings included in this list were obtained by creating a tape consisting of all headings in verified status in the subject authority file at the Library of Congress on January 17, 1992. Approximately 192,000 authority records were in the file then, compared to approximately 186,000 records in *LCSH 14*.

An analysis of the subject authority data base from which the headings in this edition were drawn indicates that the file contains approximately 12,000 personal name headings of which 10,400 represent family names, 2,800 corporate headings, fewer than 20 meeting or conference headings, 500 uniform titles, 151,000 topical subject headings, and 27,000 geographic subject headings. There are an estimated 600 general USE references, 3,100 general *see also* references, 183,000 references from one usable heading to another, and 172,000 references from unused headings to used headings.

The creation and change of subject headings is a continuous process. From 5,000 to 7,000 headings, including headings with subdivisions, are added to *LCSH* each year. Proposals for new headings and changes to old ones are submitted by catalogers at the Library of Congress (and more recently by catalogers at libraries with which the Library of Congress has an official cooperative program) and are cumulated weekly on a tentative list which is discussed at an editorial meeting. Approved proposals become part of the online authority file of subject headings at the Library of Congress from which various publications are created.

Five services provide information about new and changed headings. First, a computer tape distribution service supplies the subject headings in the USMARC authorities format on a weekly basis to supplement the master data base file of subject authority records. Second, *L. C. Subject Headings Weekly Lists* are a timely source of information about new and changed subject headings, class numbers, references and scope notes.

The lists are distributed in packets of four to five lists once a month. Third, the quarterly *LCSH* in microfiche integrates new headings into the constantly growing data base, providing the equivalent of a new edition each quarter. Fourth, the complete subject authority file is distributed four times a year on CD ROM under the title *CDMARC SUBJECTS*. Fifth, *Cataloging Service Bulletin* gives information on selected new and cancelled headings.

USE WITH AUXILIARY AIDS

LCSH 15 should be used with several auxiliary aids. Most important of these is the *Subject Cataloging Manual: Subject Headings (the Manual)*, a fourth edition of which was published in 1991, and which is sold with a subscription to update services. The *Manual* contains the same instructions used by the subject catalogers at the Library of Congress in their daily work. Although some of the instructions describe internal procedures in the Subject Cataloging Division, most of the instructions are essential for those who wish to understand and to apply Library of Congress subject headings correctly. Reference will be made to the *Manual* when additional information on a topic is described there.

Cataloging Service Bulletin contains information on the most important topics that have been changed since the latest edition of the *Manual*. It also contains lists of subject headings of current interest, lists of headings that have recently been changed, and information on subject headings publications.

Headings for names of persons, corporate bodies, jurisdictions and other headings traditionally thought to be capable of authorship may be assigned as subject headings by subject catalogers. The authority records for such headings are contained in the publications *Name Authorities Cumulative Microfiche Edition* and *CDMARC Names*, which must be consulted for the authorized form. When name headings have been printed

in *LCSH*, they have usually been borrowed from the name authority file. The full reference structure and additional authority information will appear only in the name authority file.

Free-Floating Subdivisions: An Alphabetical Index (1991) consists of all free-floating subdivisions that appear in H 1095–H 1200 and H 1631 in the *Subject Cataloging Manual: Subject Headings*. For each subdivision, a listing is provided of the free-floating lists in the *Manual* where it appears, identified by category. For subdivisions that have specific instruction sheets in the manual describing their usage, citations to these are provided. The list should be used in conjunction with the *Manual*.

Subject headings publications are available from:

Cataloging Distribution Service
Library of Congress
Washington, D.C. 20541

Questions on the content of publications should be referred to:

Office for Subject Cataloging Policy
Library of Congress
Washington, D.C. 20540

Information on the current status of subject headings publications is available from either source.

HISTORY

Like its predecessors, the fifteenth edition of *LCSH* continues to be an accumulation of subject headings established by the Library of Congress since 1898. In that year the Library decided that a dictionary catalog instead of an alphabetic-classed or a classed catalog should be adopted to complement the new classification system that replaced Jefferson's system. *The List of Subject Headings for Use in Dictionary Catalogs*, prepared by a committee of the American Library Association and published in 1895, was used as the basis for the Library's new subject headings, both figuratively and literally, since copies of the list were acquired, interleaved with blank pages, and made available for the catalogers to use. As subject headings that appeared in the ALA list were adopted by the Library of Congress, check marks were made. New and changed subject headings were handwritten into the book. As a result, by 1908 the ALA lists were coming apart from heavy use. Consequently, it was decided to print a list of the headings and to issue supplements to show additional headings or changes.

The first edition of the Library of Congress list, called *Subject Headings Used in the Dictionary Catalogues of the Library of Congress*, was printed in parts between 1909 and 1914. Supplementary lists were issued as required, followed by a second edition in 1919. Later editions were published at irregular intervals. The title changed to *Library of Congress*

Subject Headings when the eighth edition was published in 1975.

Since the inception of the list, headings have been created as needed when works were cataloged for the collections of the Library of Congress instead of on a theoretical basis. Because the Library collects in almost every field, no subject area has been ignored. Otherwise inexplicable gaps become more understandable with the knowledge that the list reflects the cataloged collections of the Library. For instance, the headings **Catholic criminals** and **Jewish criminals** will exist in the list without parallel headings for criminals of other religions until the Library has occasion to catalog books about such groups.

Another characteristic of the list is that headings are retained in new editions of the list regardless of the recency or frequency of their use. For example, the heading **Berserkers** has appeared in all editions of the list. Nevertheless, it has been used only once, assigned in 1918 to a German book published in 1882.

Because the list has expanded over time, it reflects the varied philosophies of the hundreds of catalogers who have contributed headings. As described by David Judson Haykin in the introduction to the fourth edition (1943):

The failures in logic and consistency are, of course, due to the fact that headings were adopted in turn as needed, and that many minds participated in the choice and establishment of headings.

This was expanded by Richard S. Angell in the introduction to the sixth edition (1957):

The list is the product of evolutionary forces, among them the growth of the Library's collections, semantic change, and varying theories of subject heading practice over the years. As a consequence the list is, at any point in time, an accurate reflection of practice but not a complete embodiment of theory.

Inconsistencies in formulation of headings can usually be explained by the policies in force at the varying dates of their creation.

Another characteristic of the list has been the promulgation and adoption of new policies without the ability to change existing headings formulated according to previous policies. For example, the decision was made in 1975 to stop distinguishing between professions and trades with such headings as **[Professional field] as a profession** and **[Trade]—Vocational guidance** and to use the second formulation to cover both cases. Since headings in the list are normally updated only when a new book is cataloged on the subject, headings with . . . as a profession remained in the list for five years until a project could be undertaken to eliminate the remaining older headings from the list. Because the resulting inconsistencies are frustrating to encounter, it is hoped that projects to reduce anomalies can be undertaken.

When considering whether to change headings from one form to another, whether to resolve inconsistencies or to update terminology, the Library tries to balance the presumed benefits of the change against the probable capability of LC staff and staff of other libraries to carry out the changes. Otherwise desirable changes may therefore not be undertaken.

COMPONENTS OF ENTRIES

Headings are listed in boldface type, e.g., **Alphabet**, **Life on other planets**, **Nuclear physics**. A heading may be followed in italics by the legend (*May Subd Geog*), which shows that the heading may be subdivided by place, and by class numbers. Scope notes giving guidance in the meaning or application of a heading may follow in separate paragraphs. References associated with the headings then are listed in groups, followed by subdivisions of the subject headings, which may have any or all of the above-named elements. Each of these components is described below.

Headings

Subject headings may consist of one word or several. A one-word heading is usually a noun: **Viscosity**, **Dogs**, or **Schools**, for example. Concepts are normally named in the singular and objects in the plural, though exceptions may be found.

Two-word headings usually contain an adjective and a noun. These may appear in normal word order, as with **Nuclear physics**, **Local taxation**, and **Pumping machinery**, or in inverted form. Inversion is common with adjectives describing language or nationality, such as **Lullabies, Urdu**; **Songs, French**; **Art, American**; and **Drawing, Australian**. Other types of headings may also be inverted in order to bring the noun into the initial position, such as **Love, Maternal**; **Bridges, Concrete**; and **Injections, Intramuscular**. The current policy is to use normal word order for topical headings except for headings with language, nationality, or ethnic adjectives, headings qualified by time period, such as **Art, Medieval**, headings qualified by artistic or musical style, headings with the adjective **Fossil**, and certain music headings, etc.

Although the original intent was that subject headings would follow a dictionary plan instead of an alphabetic-classed plan, the list reflects a reluctance to disperse related entries. Many headings were originally constructed in a manner which placed the name of a class first through the use of subdivisions, through inversion, or through parenthetical qualification. Examples of these are: **Photography—Studios and darkrooms**; **Type and type-founding—Italic type**; **Geology, Stratigraphic—Cenozoic**; **Railroads—Tickets**; **Insurance, Fire**; **Art, Byzantine**; **Cookery (Fish)**; and **Trials (Forgery)**. These headings and many similar ones continue to exist in the list today.

Names of geographic features have traditionally been inverted in order to place a significant word in the initial position instead of the generic word. For example, **Lake Erie** is formulated as **Erie, Lake** so that the distinguishing part of the name, **Erie**, appears first.

When more than two words are used in a heading, the heading may include conjunctions and prepositional phrases. Headings with the word *and* may express a reciprocal relationship, as in **Technology and civilization**, or they may combine two headings so similar that they are often treated together in one book, as with **Bolts and nuts**. Headings with prepositional phrases may be inverted, as in **Plants, Effect of the moon on**, and **Teachers, Interchange of**, or in normal word order, as in **Photography of birds**, **Occupational therapy for children**, and **Prediction of scholastic success**. The Library has changed some headings with inverted prepositional phrases into headings with subdivisions on a case-by-case basis.

Class Numbers

Approximately 36 percent of headings are followed by Library of Congress class numbers, which generally represent the most common aspect of a subject. If several aspects of a subject are covered by different class numbers, a term is included to indicate the specific discipline. For example,

Diesel motor

[TJ795]

Norwegian language

[PD2571-PD2699]

Shellfish

[QL401-QL445 (Zoology)]

[RA602.S6 (Public health)]

[TX387 (Shellfish as food)]

Class numbers are added only where there is a close correspondence between the subject heading and the provisions of the Library of Congress classification schedules. Because these, as well as the subject heading list, are subject to continuous revision, the class numbers in the *LCSH* should not be used without verification in the latest editions of the schedules and their supplements. Since 1986 class numbers have been corrected as soon as errors are reported.

Scope Notes

Scope notes are provided when needed to ensure consistency of subject usage by specifying the range of subject matter to which a heading is applied in the Library's catalogs, by drawing necessary distinctions between related headings, or by

stating which of several meanings of a heading is the one to which its use in the Library's catalogs is limited. These notes appear in the list immediately following the headings with which they are used. A typical example may be found under the heading **Home-based businesses**. The *Manual* contains a full description of the types of scope notes and their use. Approximately 4,000 scope notes are contained in *LCSH*.

REFERENCES: THE RELATIONSHIP BETWEEN HEADINGS

LCSH contains cross-references constructed at different times according to different philosophies. Some references from specific to general topics remain as a legacy from the turn of the century. For many years cross-references were made to subjects "likely to be of interest to the user" who consulted a subject heading. New rules for making references were developed in 1984 and applied to newly-created headings in 1985. As a result more attention has been paid to hierarchical relationships, and superfluous or inaccurate references have been deleted from the list when found. The number of references that do not follow current rules are decreasing. These rules are described fully in the *Manual*.

With the adoption of new rules for making references came the decision, with advice from others both inside and outside the Library, to use the symbols found in thesauri, as described below. Because the symbols are generated by the computer, it has been possible to adopt coding that is widely used and is mnemonic.

When the data base of subject headings was converted to the current online format in 1986, the new symbols were applied by the computer in a mechanical fashion which substituted NT for *sa*, BT for *xx*, UF for *x*, USE for *See* and RT for headings that appeared both in the *sa* and the *xx* listings under a heading. These symbols need not be used in library card catalogs. Those who wish to continue to make cross-reference cards in the manner in which they have become accustomed should continue to do so. The page entitled "Symbols" which immediately precedes the list of subject headings explains the conversion of the codes.

The Equivalence Relationship: USE References

USE references are made from an unauthorized or non-preferred term to an authorized or preferred heading. Under the heading referred to, the code UF (Used For) precedes the heading not used. The codes USE and UF function as reciprocals.

Motor-cars
USE Automobiles
Automobiles
UF Motor-cars

The word USE and the code UF appear only in front of the first reference if several references are present.

Raw foods

UF Food, Raw
Uncooked food
Unfired food

USE references are made from synonyms, variant spellings, variant forms of expression, alternate constructions of headings, and older forms of headings. USE references are also made when it has been decided that words should not be used as a heading even if the heading and the unused words are not synonymous. Headings with more than one word frequently have USE references from the words not chosen as the entry element. USE references are not normally made in this list from abbreviations, nor are they made from foreign language equivalents of topics.

USE references are often omitted if they would begin with the same word as a broader term needed for hierarchy. That is,

Exterior lighting

BT Lighting

is made instead of

Exterior lighting

UF Lighting, Exterior

Those libraries that provide only USE references in their catalogs should review the cross-reference structure of headings carefully to find cases in which additional USE references should be created. If the *LCSH* does not contain a USE reference from a word in the heading that is not the first word, catalogers are encouraged to create these references for their own catalogs if they believe that such references would be useful.

The Hierarchical Relationship: Broader Topics and Narrower Topics

Subject headings are linked to other subject headings through cross-references now expressed as Broader Topics (BT) and Narrower Topics (NT). The code BT precedes a subject heading representing, according to current policy, the class of which the heading is a class member. The code NT precedes a subject heading representing, in most cases, a member of the class represented by the heading under which the NT appears. The codes BT and NT function as reciprocals. A heading appearing as a BT must be matched by the reversed relationship as an NT, as demonstrated by the following example:

Exterior lighting

BT Lighting

Lighting

NT Exterior lighting

A heading is normally linked to one immediately next to it in the subject heading hierarchy. Since the referenced headings are linked in turn to other headings, references for distant relationships are no longer made. References leading to two or more levels in a hierarchy reflect an obsolete practice.

The results of making hierarchical relationships explicit creates a system in which superordination and subordination are clearly stated. Headings created after 1984 should follow these principles. Headings established before 1985 are being investigated. Their references are being changed to conform with the new rules. Until this review is completed, the list will contain references that do not reflect hierarchy.

The making of hierarchical references creates the ability to find systematically headings which are more general or more specific than the heading being consulted. No matter the level at which one enters the hierarchy, one can follow either BTs or NTs to find the broadest or most specific heading available. The following headings illustrate this:

Vehicles

BT Transportation

NT Motor vehicles

Motor vehicles

BT Vehicles

NT Trucks

Trucks

BT Motor vehicles

NT Dump trucks

Dump trucks

BT Trucks

By following the NTs it is apparent that the most specific heading is **Dump trucks**. By following the BTs it is equally apparent that the broadest heading is **Transportation**.

In the past many hierarchical references were omitted when the narrower heading began with the same word as the broader heading. For example, the heading **Bridges, Iron and steel** does not contain the BT **Bridges**. It was believed that alphabetic proximity eliminated the need for a hierarchical cross-reference to a heading filing immediately adjacent. Broader headings will gradually be added if required by hierarchical principles regardless of alphabetic proximity.

The Associative Relationship: Related Topics

The associative relationship, expressed by the code RT meaning Related Topic, links two headings that are associated in some manner other than by hierarchy. For example,

Ornithology

RT Birds

Birds

RT Ornithology

According to current policy few headings will be linked by associative references until the hierarchy in the list has been thoroughly reviewed.

General References

A general reference is a reference made not to specific individual headings but to an entire group of headings, frequently listing one or more headings by way of example. It was considered impractical to list as specific references all individual headings encompassed by a broader heading, even though such specific references would have been theoretically logical and proper and even though the individual headings were printed in *LCSH*. Instead, general *see also* references have been made, retaining the code SA, such as

Gums and resins

SA *specific gums and resins, e.g. Copal, Kauri gum, Kino*

It is expected that each library will make specific references to each individual gum or resin about which the library has works. Such references were made for the Library of Congress card catalogs. Many general references will gradually be replaced by specific references to narrower headings.

General references have also been made from a generic heading to a group of headings all beginning with the same word:

Chemistry

SA *headings beginning with the word Chemical*

Other general references may lead to subdivisions:

Economic history

SA *subdivision Economic conditions under names of countries, cities, etc.*

General USE references also are made:

Access control

USE *subdivision Access control under subjects, e.g. Computers—Access control; Psychiatric records—Access control*

Such general references to subdivisions do not necessarily indicate that the subdivisions are free-floating.

SUBDIVISIONS

The application of Library of Congress subject headings requires extensive use of subject subdivisions as a means of combining a number of different concepts into a single subject heading. Complex topics may be represented by subject headings

followed by subdivisions. Some subdivisions are printed in *LCSH 15* but a greater number of subdivisions may be assigned according to rules specified in the *Manual*. Only a fraction of all possible heading-and-subdivision combinations are listed in *LCSH*.

In order to facilitate reading the list and to reduce the amount of paper required to print the list, initial parts of a heading with subdivision are suppressed in printing. Instead, subdivisions appear in the list following a long dash, without repetition of the heading. For example,

**Massachusetts
—Antiquities**

was produced from a machine-readable record with the words **Massachusetts—Antiquities**. If two subdivisions are used, the main heading and the first subdivision are replaced by two long dashes:

**Massachusetts
—Description and travel
—1951–1980
—1981–**

These are carried in subject authority records as **Massachusetts—Description and travel—1951–1980** and **Massachusetts—Description and travel—1981–**. When a heading has many subdivisions that are further subdivided, such as **United States—History**, the dashes help to align the subdivisions properly.

Categories of Subdivisions

Four categories of subdivisions are generally recognized: topical, form, chronological, and geographic. Each category is described separately below, and examples may be found in *LCSH*. Instructions for assigning them appear in various sections of the *Manual*.

Topical Subdivisions

Topical subdivisions are used under main headings or other subdivisions to limit the concept expressed by the heading to a special subtopic, e.g., **Corn—Harvesting**, **Automobiles—Motors—Carburetors** and **Women—Employment**. Many topical subdivisions are omitted from the printed list. The rules for their application are found in the *Manual* and in general references printed under the generic headings in *LCSH*.

Form Subdivisions

Form subdivisions are used to indicate the form in which the material on a subject is organized and presented (e.g., congresses, dictionaries, periodicals) and as such are added as the last element to any heading. Form subdivisions represent what a work is rather than what it is about, can generally be used under any topic, and therefore are seldom printed in *LCSH*. Nevertheless, a few instances occur in the list, usually because they were established and printed before 1974, e.g.,

**Massachusetts—History—Colonial period, ca.
1600–1775—Juvenile literature
United States—History—Periodicals**

Most form subdivisions are indicated in the list by a general *see also* reference under the heading representing the form as a whole, e.g.,

Periodicals

SA subdivision Periodicals under specific subjects, e.g.
Engineering—Periodicals; United States—History—Periodicals

Guidance on the use of many specific form subdivisions, such as **—Abstracts**, **—Catalogs**, **—Dictionaries**, **—Digests**, **—Handbooks, manuals, etc.**, **—Pictorial works**, **—Tables** and others, is given in the *Manual*.

Chronological Subdivisions

Chronological subdivisions are used to limit a heading or heading-and-subdivision to a particular time period. Under names of countries and other jurisdictions or regions are printed specific topical subdivisions and the chronological subdivisions that may be used with them. The date subdivisions given under **United States—Economic conditions**, **United States—History**, and **United States—Politics and government** are illustrative.

When topical headings contain chronological subdivisions not preceded by the subdivision **—History**, the subdivisions are usually established and printed in *LCSH*, e.g.,

**Philosophy, French—18th century
Art, Chinese—To 221 B.C.**

Geographic Subdivisions

The designation (*May Subd Geog*) after a subject heading or subdivision indicates that a geographic location may follow

the heading or subdivision. The designation (*Not Subd Geog*) after a subject heading or subdivision indicates that a decision has been made not to divide a particular heading by geographic location. Omission of either designation normally means that the heading has not been reviewed to determine whether geographic subdivision is possible or desirable and that geographic location should not therefore be used.

Instructions for subdivision by place may occur under an individual heading in a scope note, but a full description of the rules are given in the *Manual*. Generally, if the geographic entity is the name of a country or is larger than a single country, the established name is placed immediately after the heading or subdivision that has the code (*May Subd Geog*). **Labor supply** (*May Subd Geog*) means that place follows the subject, as in **Labor supply—France**. If the geographic entity is the name of a region, the name of a geographic feature, the name of a state or province, or the name of a city, then the name of the country precedes the name of the smaller geographic locality. The result of this practice is to gather most of the localities as further subdivisions under the name of the country, as with **Labor supply—France—Paris**.

The major exception to interposing the name of the country is that four countries—the United States, Great Britain, Canada, and the Soviet Union—do not serve as gathering devices for smaller jurisdictions or geographic entities. The names of states, constituent countries, provinces and republics, instead of the country name, serve as gathering devices for the smaller jurisdictions or geographic areas. Additional exceptions to the general rule stated above are described in the *Manual*.

If a heading contains both a geographic subdivision and topical or form subdivisions, the location of the geographic subdivision depends on which elements can be subdivided by place. As a general rule, place follows the last element that can be divided by place. Following this rule for the heading from *LCSH* 15 with subdivisions below

Construction industry (*May Subd Geog*)
 —Finance
 —Law and legislation (*May Subd Geog*)
 —Government policy (*May Subd Geog*)
 —Industrial capacity

will result in these combinations:

Construction industry—Italy
Construction industry—Italy—Finance
Construction industry—Finance—Law and legislation—Italy
Construction industry—Government policy—Italy
Construction industry—Italy—Industrial capacity

Few geographic subdivisions are printed in *LCSH*. For example, the heading **Petroleum wastes** is followed by the code (*May Subd Geog*), but no instances of geographic subdivision are printed. In this case, the specific rules for geographic subdivision in the *Manual* must be consulted in order to construct a subject heading with geographic subdivision correctly. Those geographic subdivisions that are printed are usually required so that narrower headings may lead from the topic in a special place to an instance of that topic. For example, under the heading **Rivers** (*May Subd Geog*) many geographic subdivisions are printed so that references may lead to the names of individual rivers. Some geographic subdivisions may appear in the list without an NT listing, as under **Architecture, Domestic—[place]**. In that case, obsolete policies required that this heading function as a BT for named dwellings.

Geographic Subdivision and Place Names Divided by Topic

The problem of geographic place in relation to a topic is handled in two different ways in *LCSH*. Topical subject headings can be subdivided by place, as in **Labor supply—France**, or geographic headings may be subdivided by topic, as in **Massachusetts—History**. Since a general rule does not exist that explains under which circumstances one method is preferred to the other, it is best to rely on instructions under the specific subject headings to determine which method is used. If a subject heading contains the designation (*May Subd Geog*) a geographic place is brought out by subdivision. For example, **Labor supply** (*May Subd Geog*) means that place will follow the subject, as in **Labor supply—France**. If, however the heading lacks the instruction or specifically states (*Not Subd Geog*) and there is a general reference to a specific subdivision under names of places, then the specific geographic area precedes the topic. For example,

History

SA subdivision History under specific subjects and under names of countries, states, cities, etc.

authorizes the construction of the combination **Massachusetts—History**.

The use of subdivisions under names of places is more problematic because it is necessary to refer to the *Manual* for a complete listing of these subdivisions. No place name has been chosen that lists all of the available subdivisions. Nevertheless, the subdivisions under the headings **France**, **Great Britain**, and **United States** in *LCSH* are representative of some of the subdivisions that may be used. However, date subdivisions must be established uniquely under each place name.

Free-floating Subdivisions

Until 1974, subject catalogers normally established specific heading-and-subdivision combinations by preparing authority cards and submitting the combination for review, approval, and printing in *LCSH*. In 1974 it was decided that many subdivisions of subject headings would in the future be constructed according to rules instead of according to specific authorization, and the term *free-floating subdivision* was coined. Because authority records have seldom been prepared for these combinations since 1974, the resulting combinations infrequently appear in *LCSH*. Therefore, those subdivisions that do appear are either remnants from earlier days or subdivisions needed so that narrower headings or previously used headings can be shown.

Free-floating subdivisions are assembled in building-block fashion by the cataloger at the time of assigning subject headings to a work being cataloged. Most subdivisions are accessible in *LCSH* itself either through a general reference under the heading that is the same as a subdivision (for example, **Abstracts**), or through a general USE reference (for example, **Ability testing**). In addition, guidelines for the use of many subdivisions appear in the notes and references under the corresponding generic headings or references in the text of *LCSH*. *Free-floating Subdivisions: An Alphabetical Index* is a useful tool for determining which free-floating subdivisions are available and with what type of headings they may be used. In addition, catalogers should refer to various lists and rules in the *Manual* in order to combine elements correctly.

PATTERN HEADINGS

In 1974 the principle of free-floating subdivisions controlled by pattern headings was officially incorporated into *LCSH*. Standardized sets of topical and form subdivisions were developed for use under particular categories of subject headings or name headings used as subjects. To avoid repeating these subdivisions under all possible headings, only one or a few representative headings from each category are printed in *LCSH* with

a set of the subdivisions appropriate for use under other headings belonging to the category. Such headings are called pattern or model headings for the particular categories.

Because many subdivisions now authorized as free-floating by a pattern heading were printed in *LCSH* before 1974, they still appear in numerous instances under individual headings belonging to a category. Some headings incorporating subdivisions controlled by pattern headings are needed to provide the reference structure for other headings.

General free-floating subdivisions are not usually printed in *LCSH* under pattern headings. However, some general free-floating topical and form subdivisions are listed under pattern headings if they represent an important topic or type of material pertinent to the category, or if they are cited as examples in general *see also* references.

Any subdivision once established under a pattern heading is usable, if appropriate and no conflict exists, under any other heading belonging to its category. Within these specified limits, it is a free-floating subdivision.

For example, a set of subdivisions has been developed for organs and regions of the body. Typical headings belonging to this category include **Alimentary canal**; **Ganglia**, **Autonomic**; **Pituitary body**; **Renal artery**; **Toes**; etc. There are two pattern headings for parts of the body: **Foot** and **Heart**. The subdivisions established under either of these headings may be used as free-floating subdivisions under any heading belonging to the category. To illustrate, the heading **Joints—Biopsy** is not printed in *LCSH*. It is nonetheless a valid heading because the subdivision **—Biopsy** appears under **Heart**.

Additional information on pattern headings is found in the *Manual*. Types of headings included in the categories are described there. Lists of the subdivisions that can be used under other headings belonging to the category are also provided. When new subdivisions are added to the pattern headings, the subdivisions are printed under the pattern headings in *LCSH*.

The table of pattern headings is arranged alphabetically by category of headings covered by the pattern headings; the specific headings under which the subdivisions will appear in *LCSH* are listed in the right-hand column.

Table of Pattern Headings

<i>Category</i>	<i>Pattern Heading</i>
Animals (General)	Fishes
Animals, Domestic	Cattle

Vehicles, Land	Automobiles
Wars	World War, 1939–1945
	United States—History—Civil War, 1861–1865

CATEGORIES OF HEADINGS INCLUDED IN THE LIST

LCSH is primarily a listing of topical subject headings. Ever since the first edition, names of persons and names of corporate bodies (jurisdictions, companies, etc.) have been omitted from the list unless needed as patterns or examples, or unless a subdivision must be printed. In addition, the list in the past omitted some of the topical headings established and assigned as subject headings to bibliographic records by the Library of Congress. Although certain categories of headings were established and applied to works cataloged, they were omitted from the printed list in order to save space.

In 1976 the decision was made to print the following types of formerly omitted headings: names of sacred books; names of families, dynasties, royal houses; gods; legendary and fictitious characters; works of art; biological names; and chemicals. Headings in these categories appear in the list if they were established after 1976.

In 1976 the Library also began to print several other categories of former nonprint headings: geographic regions and features; city sections; archaeological sites; ancient cities; empires; structures; buildings; roads; parks and reserves; plazas; streets; and other proper names not usually capable of authorship. These headings, however, were all affected by the adoption by the Library of the *Anglo-American Cataloguing Rules*, 2d edition, in 1981. Therefore, this edition of *LCSH* contains ten years' worth of headings in the categories above, since the Library has removed most of the headings that were printed between 1976 and 1981 that did not conform with *AACR 2*.

The list also contains an artificial structure called a "multiple," of which **Subject headings—Aeronautics**, [**Education**, **Law**, etc.] and **Civil rights—Religious aspects—Buddhism**, [**Christianity**, etc.] are examples. These multiple subdivisions are intended to indicate that analogous subdivisions may be used as needed without a specific authority record. That is, under the heading **Civil rights—Religious aspects** the name of any religion may be assigned as a further subdivision.

CATEGORIES OF HEADINGS OMITTED FROM THE LIST

Three categories of headings are omitted from the list: headings that appear in the Name Authority File, free-floating phrase headings, and certain music headings.

Headings Residing in the Name Authority File

Personal names, corporate bodies, names of jurisdictions, names of meetings and conferences, and uniform titles are

omitted from the subject headings list unless used as a pattern or example, or unless a subdivision or special instruction must be printed. To find the established forms of name headings that do not appear in *LCSH* consult *Name Authorities Cumulative Microfiche Edition* or CDMARC Names.

Free-floating Phrase Headings

These headings are not established by subject catalogers but are composed and applied as needed without the creation of an authority record. These headings are:

[Personal name] in fiction, drama, poetry, etc.
[Topic or place] in literature
[Topic or place] in art
[Name of city] Metropolitan Area ([Geographic qualifier])
[Name of city] Region ([Geographic qualifier])
[Name of city] Suburban Area ([Geographic qualifier])
[Name of river] Region ([Geographic qualifier])
[Name of river] Watershed ([Geographic qualifier])
[Name of river] Valley ([Geographic qualifier])
[Name of geographic feature] Region ([Geographic qualifier])

Establishing and Printing Certain Music Headings

Although a large number of existing music headings have been printed in *LCSH*, in the future when specific cross-references are not needed, LC will not be printing headings with qualifiers specifying instruments or vocal parts when the main heading has a general scope note, with or without a general see also reference. These headings are:

Headings for instrumental chamber music not entered under musical form:

Trios, Quartets, Quintets, etc.
Bass trios, etc.
String trios, etc.
Wind trios, etc.
Woodwind trios, etc.

Headings for musical forms that take qualifiers for instrumental medium:

Canons, fugues, etc.
Chaconnes
Choral preludes
Marches
Minuets

Monologues with music

Overtures

Passacaglias

Polkas

Polonaises

Potpourris

Rondos

Sacred monologues with music

Sonatas

Suites

Symphonic poems

Symphonies

Trio-sonatas

Variations

Waltzes

Choruses; Choruses, Sacred; and Choruses, Secular, qualified by number of vocal parts and accompanying medium.

Songs, Sacred songs, and Vocalises qualified by voice range and accompanying medium.

Sacred duets, etc., and Vocal duets, etc., qualified by accompanying medium (these headings do not have general scope notes, but the qualifiers are constructed like those for **Choruses, Songs, etc.**).

The decision not to print all headings with qualifiers specifying instruments is based on the fact that the order of instruments listed in qualifiers has now been firmly established and an appropriate heading can be formulated as needed by following the sequence of instruments given: (1) keyboard instruments, (2) wind instruments, (3) plectral instruments, (4) percussion and other instruments, (5) bowed stringed instruments, (6) unspecified instruments, and (7) continuo. The instruments in each category are given in alphabetical order with the exception of bowed stringed instruments, which are given in score orders, e.g., **Octets (Piano, clarinet, flute, oboe, percussion, violin, viola, violoncello); Octets (Piano, clarinet, flute, guitar, mandolin, accordion, percussion, double bass); Quartets (Flute, violin, viola, continuo).**

In headings for duets, the order of instruments prescribed above is not always followed. When one of the instruments is chordal (usually a keyboard instrument) or serves as an accompaniment for the other, it is given in second position, e.g., **Violin and piano music; Violin and harp music; Harp and piano music; Piano and organ music.** For each duet heading, the main list may be consulted since a *see* reference is always made from the alternative possibility.

When two or more of an instrument are needed for performance, the arabic number is placed after the name of the instrument and enclosed by parentheses, e.g., **Sonatas (Pianos**

(2), 8 hands); Violins (2) with string orchestra; Trios (Piano, unspecified instruments (2)).

FILING ARRANGEMENT

Filing rules that provide for efficient arrangement of bibliographic entries by computer have been followed. These rules (*Library of Congress Filing Rules*, 1980) are also used in other Library of Congress computer-generated bibliographic products.

The basic principle is to file a heading strictly as expressed in its written form, word by word. A word is defined as consisting of one or more letters or numerals set off by spaces or marks of significant punctuation, such as the hyphen. Therefore, abbreviations, acronyms, and initials without interior punctuation (e.g., Dr., ALGOL, IBM) are filed as words. Initials separated by punctuation are filed as separate words at the beginning of their alphabetic group.

C-coefficient

C.F. & I. clause

C.O.D. shipments

Ca Gaba Indians

Cazcan Indians

CCPM test

Crystals

CTC system (Railroads)

Modified letters with diacritics are filed with their unmodified equivalents.

Möbius function

Mobs

Moeller family

Molds (Botany)

Möller family, see Moeller family

Mollusks

Numbers that are expressed in digits, both arabic and roman, precede alphabetic characters and are arranged in increasing numeric value.

4-H clubs

10 Downing Street (London, England)

35mm cameras

1939 A.D. see Nineteen thirty-nine, A.D.

6502 (Microprocessor)

A-5 rocket

A.C. automobile

A priori

A3D bomber see Skywarrior bomber

Aamand family

Four-day week

Nineteen thirty-nine, A.D.
P-40 (Fighter planes)
p-adic numbers
P-STAT (Computer system)
Paavola family
PAC (Computer program)
Pac-Man (Game)
Pacific Coast (Peru)
PADIS (Information retrieval system)
PC-1500 (Computer)
PC DOS (Computer operating system)
Peace

In a chronological file, dates are arranged according to proper chronology. The word "To" is treated as if it were 0. In a chronological progression the shortest period is filed first. Period subdivisions are arranged chronologically even when the dates do not appear first. If two spans begin with the same date, the shorter time period files first:

Great Britain—History—To 55 B.C.
Great Britain—History—To 449
Great Britain—History—To 1066
Great Britain—History—To 1485
Great Britain—History—Anglo-Saxon period, 449–1066
Great Britain—History—Edward, the Confessor, 1042–1066
Great Britain—History—William I, 1066–1087
Great Britain—History—Norman period, 1066–1154
Great Britain—History—1066–1687

Inverted headings file ahead of headings with parenthetical qualification:

Children
Children, Adopted
Children, Vagrant
Children (International law)
Children (Roman law)

In any subject heading, subordinate elements that follow a dash are grouped in the following order:

- (a) period subdivisions, arranged chronologically
- (b) form and topical subdivisions, arranged alphabetically
- (c) geographic subdivisions, arranged alphabetically

These sequences are maintained at every level of subject subdivision.

United States—Foreign relations—20th century
United States—Foreign relations—1945–
United States—Foreign relations—Executive agreements
United States—Foreign relations—Treaties
United States—Foreign relations—Iran
United States—Foreign relations—Latin America

The filing rules require that certain entries, usually personal and corporate entries with titles, follow an unsubdivided heading and precede that heading with subdivisions. This will result in filing sequences as follows:

Bible
Bible. Polyglot
Bible—Abridgments
Bible—Versions
Bible. N.T. Matthew

Shakespeare, William, 1564–1616

The subdivisions provided under this heading . . .

Shakespeare, William, 1564–1616. Hamlet
Shakespeare, William, 1564–1616—Acting
 see Shakespeare, . . .

United States
United States. Declaration of Independence
United States—Air defenses
United States—Territories and possessions
United States. Air Force

It is necessary to consult the unsubdivided heading preceding the author/title combination because it may contain information essential to understanding how the heading operates, such as whether it may be divided by place.

REVISED LC SUBJECT HEADINGS

The following is a list of subject headings that have been cancelled since publication of the 14th edition of *Library of Congress Subject Headings*, together with their replacement headings.

CANCELLED HEADING	REPLACEMENT HEADING

Annotated Card Program

AC Subject Headings

In the fall of 1965 the Library of Congress initiated the Annotated Card Program. The purpose of this program was to provide a more appropriate and in-depth subject treatment of juvenile titles and to offer easier subject access to the materials. This was accomplished chiefly through a more liberal application of the subject headings in *Library of Congress Subject Headings (LCSH)*. In some cases the rules for application were changed and headings were simplified; in a few instances headings were created where none had previously existed. The Annotated Card Program (AC) list is a list of exceptions to the Library of Congress subject headings list and therefore must be consulted and used in conjunction with it.

In 1969 the first edition of *Subject Headings for Children's Literature* was published. It explained guiding principles of the AC program and listed those headings that varied from *LCSH* in application or form. Since then the list has more than doubled in size. New policies have been initiated and old ones changed or terminated as feedback was received from the American Library Association ALCTS CCS Committee on Cataloging of Children's Materials and from the field.

While the AC list contains certain departures from *LCSH*, it was intended primarily to provide a liberal extension of *LCSH*. Any departure from *LCSH* was to be guided by the headings in the *Sears List of Subject Headings (Sears)*, the advice of the ALA ALCTS CCS Cataloging of Children's Materials Committee, and the needs of children's libraries as articulated by authorities in the field. The Children's Literature Section in the Subject Cataloging Division of the Library of Congress, which carries out the Annotated Card Program by assigning AC headings to and preparing descriptive annotations for children's materials, has a representative on the ALA ALCTS CCS Committee on Cataloging of Children's Materials. The committee provides a forum for those concerned with the cataloging of children's materials, forwarding comments and suggestions from interested persons in the field to the Library of Congress as well as making specific recommendations of its own.

The committee has considered the problems of cataloging for children's collections, particularly the lack of uniformity

prevalent in cataloging children's materials among various sources. As a step toward urging standardization, the committee recommended at the 1969 ALA Midwinter Conference "the adoption of Library of Congress cataloging of children's materials as the national standard." Guidelines for the standardized cataloging of children's materials were subsequently written and published in *Top of the News* in the fall of 1983.

Below is a description of the ways in which AC headings differ from standard LC headings in form and application. Terms not used, sources consulted in establishing headings, and subdivisions that are an exception to LC standard policies or patterns are described. The list includes all AC headings which vary in application or form from the standard LC subject headings and those especially created for the AC program. The AC list must be used in conjunction with *LCSH* and its cross-reference structure is to be observed except as noted. When headings which appeared in earlier editions of *Subject Headings for Children's Literature* are incorporated in *LCSH*, they are removed from the following list if the AC and LC interpretation is identical.

AC headings appear in brackets on Library of Congress printed cards for books which have the notation AC following the card number. AC headings are identified by the second indicator of 1 in 6XX fields in MARC records for books which have the notation AC following the card number. In MARC records for other materials, AC headings are also identified by a second indicator of 1 in the 6XX fields.

CATEGORIES OF AC HEADINGS

The headings used on annotated cards represent three categories: standard LC, modified LC, and new headings established for exclusive use on annotated cards.

By far the most numerous are the standard LC headings. Included are topical headings, most proper names, geographic names, and subdivisions. Geographic and place names are used as established by the Library of Congress for regular cataloging.

The following headings are typical of standard LC headings applied to children's materials: **Chemistry, Analytic—Laboratory manuals; Conductors (Music); Isotopes; Women astronauts; Socially handicapped; Utah—History; Vietnamese Conflict, 1961–1975; Warren, Earl, 1891–1974.**

The modified LC headings, many of which are found in the Sears list or in other sources, contain the following types of adjustments:

(1) Spelling is modernized, and hyphens are removed from headings like **Lifesaving; Cave dwellings.**

(2) Foreign names are frequently used in forms more commonly known in the United States. Therefore, names of persons, organizations, or titles may be changed from the AACR 2 form used in regular LC cataloging to conform with popular English usage, as with **Ferdinand Magellan** rather than **Fernao Magalhaes; Solidarity** (Polish labor organization) rather than NSZZ **"Solidarnosc"** (Labor organization); and **Dostoyevsky, Fyodor, 1821–1881. Crime and punishment** rather than **Dostoyevsky, Fyodor, 1821–1881. Prestuplenie i nakazanie.**

(3) Subdivisions are sometimes used instead of inversion or qualification, as with **Animals—Training** instead of **Animals, Training of; Cookery—Meat** instead of **Cookery (Meat).**

(4) Words and phrases that would be superfluous in a juvenile catalog are deleted in headings like **Moneymaking projects [for children]** and **First aid [in illness and injury].** The adjective **Children's** is usually deleted, so that a heading such as **Children's parties** becomes **Parties**, and **Children's songs** becomes **Songs.**

(5) Some *Sears* headings and subdivisions are used instead of the AC equivalents: **Pigs; Robbers and outlaws; and —Collections.**

(6) The common names of plants and animals are often used instead of the scientific ones. For those names not appearing below, consult the LC standard list.

New headings are established for use on AC annotated cards when neither *Sears* nor *LCSH* provide suitable terminology, form, or scope. Into this group fall such headings as **Clay modeling; Moon rocks; Safety; and Spanish language materials.**

In establishing a heading that varies from LC, catalogers consult numerous sources in order to arrive at the term thought to be the most effective for AC purposes. Literature in the subject area is consulted; spelling is accepted from *Webster's Third New International Dictionary*, except for hyphenated terms; index terms are checked in indexing sources widely used by the public, such as the *Reader's Guide to Periodical Literature* and the *New York Times Index*. *Sears*, children's encyclopedias, the *Hennepin County Library Cumulative Authority List*, and

reference sources usually found in public and school libraries are also consulted.

APPLICATION OF SUBJECT HEADINGS

Some of the chief differences between the AC and LC headings are in application rather than in form. For example:

(1) Omission of subdivisions such as **—Juvenile fiction** and **—Juvenile literature** which would be superfluous in a children's literature catalog.

(2) Restriction of the use of the subdivision **—United States** and the qualifying term **American** to topics that are predominantly international in scope, such as **Art, Music, and Folklore.** In these cases where the presentation is limited to the United States, qualification or subdivision is used, as with **Art, American; Folklore—United States; Music, American.** Otherwise, **—United States** and **American** are seldom used since most of the material purchased by children's libraries in the United States reflects an American orientation rather than an international one. Thus LC's **Bridges—United States** becomes **Bridges**, denoting both works about United States bridges and works about bridges in several different countries. However, other geographical subdivisions are retained and are used for books limited to a particular country or state, as in the headings **Bridges—Great Britain** and **Bridges—Virginia.**

(3) Omission of any geographic subdivision for subject headings denoting classes of persons, such as **Athletes, Composers, and Explorers.**

(4) Assignment of subject headings to fiction when such headings can provide a helpful approach to the literature. For example, if a story adds to the reader's information about a country, a social problem, or a profession, headings are used such as: **Switzerland—Fiction; Drug abuse—Fiction; Teachers—Fiction.** Abstract concepts are also recognized, such as **Friendship—Fiction** and **Self-reliance—Fiction.**

(5) Use of both specific and general subject headings. In a catalog for a children's collection a young reader can locate works through both a specific and a general approach, whereas the regular assignment of subject headings may provide only the specific subject heading. For example, a work on the Pittsburgh Pirates baseball team receives two headings: 1. **Pittsburgh Pirates (Baseball team)** 2. **Baseball.** Only the first subject would be assigned in regular cataloging.

(6) Use of both popular and scientific terms, sometimes assigned to the same work. For material intended for very young children, the popular term is used, as in the headings **Weather** and **Fossils.** When the book is intended for older children, both the popular and scientific terms are frequently assigned. Thus a single record may carry such headings as 1. **Weather.** 2. **Meteorology.** or 1. **Fossils.** 2. **Paleontology.** When books

are intended for young adults, ordinarily only the scientific term is provided : **Meteorology** or **Paleontology**.

(7) Use of headings denoting form or kind. Such headings, created to make certain types of material more accessible to the reader, include **Jokes**, **Counting games**, **Stories without words**.

SUBDIVISIONS

While many of the most commonly used LC subdivisions can be used in a catalog devoted exclusively to children's literature, some subdivisions require modifications in form or application. The following subdivisions are exceptions to *LCSH* form and practice. Other subdivisions are used as they are in standard LC practice.

Biography

Used for both collected and individual biographies but only under names of ethnic groups, as in **Indians of North America—Biography**, and under subject fields where no specific term designates the profession or contributions of the biographe, as in **Aeronautics—Biography**. However, where a term designates the profession, such as **Engineers**, the subdivision is not used.

Cartoons and comics

Used on topical materials presented through cartoons and comics.

Collections

Used for publications containing works by more than one author.

Fiction

Used under all subjects for individual or collected works of fiction on identifiable topics.

Guides

Used instead of the LC subdivision Guide-books.

Habits and behavior

Used under any kind of animal, bird, reptile, or fish.

Illustrations

Not used. See Pictorial works.

Pictorial works

Used under all subjects presented exclusively or predominantly through pictorial matter.

Wit and humor

Used on topical wit and humor, including jokes and riddles.

REFERENCES

While complete hierarchies are usually not provided for terms in the AC list, most headings have at least one reference. The most common reference occurs when one term is used to designate a particular topic or concept, and *see* references are made from synonyms or alternative expressions to that heading. For example, for AC purposes the term **Tumbleweeds** is preferred to the LC heading **Russian thistle** and a *see* reference reflects this fact. If a complete hierarchy is needed, consult the LC list under **Russian thistle**.

In some cases, a valid term from *LCSH* may be printed in the AC list in order to provide references that show how the term is related to others for AC purposes.

When a heading appears with no references, it usually means that the spelling or form differs from that used in *LCSH*. **Lifesaving** has no references; it appears on the AC list as one word but is hyphenated in *LCSH*. **Cookery—Bananas** has no references; it appears on the AC list as a heading with a subdivision but appears in *LCSH* as **Cookery (Bananas)**, a heading with a parenthetical qualifier.

NOTES

A note may be included to define the scope of a heading, especially if it is being used in a way that differs from *LCSH*.

QUESTIONS

Questions about the Annotated Card Program and the construction and use of AC headings should be sent to:

Yiddish language
 — Readers
 Here are entered reading texts in Yiddish containing material for instruction and prac-

tice in reading that language. Works written in Yiddish intended primarily for general information or recreational reading are entered under Yiddish language materials.

Yiddish language materials

Here are entered works written in Yiddish intended primarily for general information or recreational reading. Such works with text also given in English are further subdivided by the subdivision Bilingual, i.e., Yiddish language materials—Bilingual. Reading texts in Yiddish containing material for instruction and practice in reading that language are entered under Yiddish language—Readers.

Symbols

UF Used For
BT Broader Topic
RT Related Topic
SA See also
NT Narrower Topic

Use of these symbols in the expression of relationships between headings is explained in the Introduction.

For those libraries maintaining manual card catalogs, the following may be used as a guide.

The change in codes for cross references does not require users to alter the style of cross reference cards made for card catalogs.

The USE and UF can be translated into "see" and "see from" respectively.

The BT and RT can be translated into "see also from".

The SA and NT can be translated into "see also".

- Alphabet
Here are entered general and comparative works dealing with the Semitic alphabet and its ancient and modern derivatives, or with similar series of characters employed to represent the sounds of a language. Works on variations in the style of writing in the past, and especially with ancient and medieval handwriting, are entered under Paleography. Works on written languages as a form of communication or discourse are entered under Written communication. Works on the process or result of recording language in the form of conventionalized visible marks or graphic signs on a surface are entered under Writing. Works on the writing of a particular language are entered under the name of the language with subdivisions Alphabet and Writing, e.g. Greek language—Alphabet; Egyptian language—Writing. Works on systems of writing used by several peoples are entered under Writing, followed by the name of the system, e.g. Writing, Arabic. UF Letters of the alphabet

Amphibious warfare
 Here are entered works on the joint operation of
 air, land, and sea forces to establish troops on shore,
 as developed in World War II. General works on the
 landing of waterborne or airborne troops on hostile
 territory, including the tactics of transporting, land-
 ing and establishing such troops and their supplies,
 and combat during the landing phase are entered
 under Landing operations.

 [NK]
 Here are entered works on decorative or utilitarian objects, generally more than one hundred years old, that have aesthetic or historic importance and financial value. General works on any objects of interest to collectors, including mass produced items of little intrinsic value, are entered under Collectibles. Works on decorative art objects are entered under Art objects.

Here are entered works on the design and style of structures. Works on the process of construction are entered under Building. General works on structures or edifices are entered under Buildings.

This heading is subdivided by place for works on architecture indigenous to the place named, e.g. Architecture—United States. The heading is qualified by a national qualifier for works on architecture of the type named in the qualifier but located in other places, e.g. Architecture, American—India.

Arms control (May Subd Geog)
[JX1974]

Here are entered works on plans, arrangements, or processes resting upon explicit or implicit international agreement which govern the numbers, types, or performance characteristics of weapons systems and/or the numerical strength, organization, equipment, deployment, or employment of the armed forces of the parties involved. Works on the reduction, either unilaterally or internationally, in the personnel and/or equipment of armed forces are entered under Disarmament.
